Chinese civilisation was for a long period more advanced than European. From China, Europe acquired printing, paper-making, the compass, gunpowder and locks for canals. Yet it was in Europe that steady economic growth first occurred and then the Industrial Revolution. And it was in Europe that representative government and individual rights, those other hallmarks of modernity, first developed. What is it about Europe? Celebrated historian John Hirst offers a fascinating exploration of the qualities that made Europe a world-changing civilisation. The Shortest History of Europe begins with a rapid overview of European civilisation, describing its birth from an unlikely mixture of three elements: classical learning, Christianity and German warrior culture. Over the centuries, this unstable blend produced highly distinctive characters - pious knights and belligerent popes, romantics spouting folklore and revolutionaries imitating Rome - and its coming apart provided the dynamic of European history in modern times. Meanwhile the common people were tilling the soil, until they became the first to enjoy the prosperity of an industrialised urban society. The Shortest History of Europe is a clear, humorous and thought-provoking account of a remarkable civilisation.

Finalist for the Pulitzer Prize Winner of the Council on Foreign Relations Arthur Ross Book Award One of the New York Times' Ten Best Books of the Year Almost a decade in the making, this much-anticipated grand history of postwar Europe from one of the world's most esteemed historians and intellectuals is a singular achievement. Postwar is the first modern history that covers all of Europe, both east and west, drawing on research in six languages to sweep readers through thirty-four nations and sixty years of political and cultural change-all in one integrated, enthralling narrative. Both intellectually ambitious and compelling to read, thrilling in its scope and delightful in its small details, Postwar is a rare joy.

A History of Europe is a masterful narrative, bringing together the continent's common threads of history from the end of the ice ages until the present day. Travel back in time to rise of the Roman Empire, the brutal Viking raids, the cultural explosion of the Renaissance period, all the way up to the dissolution of the Soviet Union and the rise of consumer culture in the 21st century. Accomplished historian Jeremy Black acts as a knowledgeable guide to the past and the ways that it has shaped society today.

Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America, Africa and Polynesia. The second part discusses the ways in which these international systems were brought into contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization and their consequences on contemporary society. History of International Relations provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.
