Capturing the grandeur of landscapes or mood of a certain natural light is challenging but often the simple details of a texture or color evade photographers most of all. In Close Up Photography in Nature, best-selling authors and nature photography pros, John and Barbara Gerlach, share the tips and techniques necessary to successfully photograph the beauty all around you. The Gerlachs are celebrated teachers who understand a photographer's mind so they begin this book with a brief overview of the fundamentals before delving into some of the more advanced and unique challenges of close up photography. Topics covered include: advanced flash techniques specific for close up shooting, as well as a discussion on focus stacking strategies and tilt-shift lenses for getting maximum depth-of-field. The Gerlachs also discuss their strategy of mixing flash with natural light when shooting close up, which opens up all sorts of photographic possibilities -- opening up shadows, creating shadows, separating the subject from the background, reducing contrast between the subject and the background, improving the color rendition, shooting sharper images, and much more. This book will change the way you see the world as well as the way you share it through your work! the world through your work!

Presents detailed advice and color photo examples for advanced amateur and professional photographers, covering such aspects as light, lenses, composition, shutter speeds, interpretive rendition, films and filters, wildlife, and closeups, as well as travel, underwater, and scenic photography.

A stylistic tour de force, this is the definitive yearbook of photographic art.

This book is a complete guide to the operations, features, menus, and controls of the Fujifilm X100S camera, providing guidance about how to accomplish things with the camera, as well as when and why to use certain features. The book covers topics such as autofocus, manual focus, depth of field, aperture priority, shutter priority, HDR (high dynamic range) photography, and macro photography. It also includes discussions of the camera ’ s special features, including its " hybrid " optical and electronic viewfinder system. The book ’ s more than 300 color photographs illustrate the camera ’ s controls and menus, and include examples of the photographs that can be taken using the many creative settings of the camera, including the Film Simulation settings, various manu options such as Dynamic Range, Shadow Tone, and Highlight Tone; the Advanced Filter settings, with effects such as Toy Camera, Dynamic Tone, and Miniature; and the camera ’ s features for continuous shooting, including a special capability for taking multiple exposures of a single scene. In addition, the book provides introductions to topics such as infrared photography, street photography, and astrophotography. The book also includes a full discussion of the video recording abilities of the X100S, which can record high-definition (HD) video with stereo sound. In three appendices, the book provides details about accessories available for the camera, sets forth a list of web sites and other resources for further information, and includes a section with helpful " quick tips " that give insights into how to take advantage of the camera ’ s features in the most efficient ways possible.

The only how-to visual reference available on large format nature photography, packed with expert tips from a master photographer!
