One day in the early spring, Alice Winter came home from school, and, after the usual question at the door, "Is mamma at home?" rushed upstairs, and found to her great surprise that her papa was at home, talking very earnestly to Mrs. Winter. When Alice came into the room, Mr. Winter stopped talking, and she wondered very much what they could have been talking about so earnestly, as all she heard was her papa asking, "Do you think we had better take her

with us?" "Why, papa! What is the matter? Are you going away? Are you sick? What made you come home so early?" were the questions which Alice gave rapidly, without waiting for an answer. Mr. Winter said, "Yes, dear, I am obliged to go to Nuremberg, Germany, on business immediately, and mamma is trying to make up her mind whether it is best for her to go with me. She does not like to leave you for so long a time, and we do not think it wise to take you with us, when you are getting on at school so nicely."

This revision of Boyce & DiPrima's text maintains its classic strengths: a contemporary approach with flexible chapter construction, clear exposition, and outstanding problems. Like previous editions, this revision is written from the viewpoint of the applied mathematician, focusing both on the theory and the practical applications of Differential Equations as they apply to engineering and the sciences. A perennial best seller designed for engineers and

scientists who need to use Elementary Differential Equations in their work and studies. The CD-ROM includes: The award-winning ODE Architect software. The software's 14 modules enable you to build and solve your own ODEs, and to use simulations and multimedia to develop detailed mathematical models and concepts in a truly interactive environment. The ODE Architect Companion. The Companion extends the ideas featured in each multimedia module. The web-based learning tools include: Review & Study Guidelines. The Chapter Review Guidelines will help you
