potential problems, and there is advice on regular maintenance and winterising and repair. Jean-Luc Pallas's enthusiasm for passing on his knowledge, as well as his clear explanations, precise advice and step-by-step instructions make this a unique book.

This text covers both basic science and clinical aspects of the cornea and associated external diseases. In this edition the editors have incorporated relevant basic science information into the clinical science chapters. It also contains an expanded surgery section - especially refractive surgery.

Emphasis on the third edition is on clinical information (the basic science has been incorporated into the clinical

This book addresses customized laser vision correction, an integral management option for the treatment of irregular corneas. This type of treatment reshapes the corneal surface in order to improve both the quality and the quantity of vision by reducing high order aberrations. Beginning with an introduction to the basics of this science, each type of customized laser vision correction is discussed in a clear and didactic format for rapid attainment of information. Throughout this practical clinical guide, examples are supported with the most recent scientific material and a step-by-step systematic
