In the case of the 2010 BMW 335d, the turbocharged diesel engine's exhaust is treated with a urea-based AdBlue solution that neutralizes noxious gases. Pair that with the government-mandated use of ultra low sulfur diesel (ULSD) fuel, and you have a modern diesel without the foul, smoky tailpipe emissions associated with models of the past. #9.

“It seemed as if Theodore Roosevelt’s biographers had closed the book on his life story. But Ryan Swanson has uncovered an untold chapter” (Johnny Smith, coauthor of Blood Brothers: The Fatal Friendship between Muhammad Ali and Malcolm X). Crippling asthma, a frail build, and grossly myopic eyesight: these were the

ailments that plagued Teddy Roosevelt as a child. In adulthood, he was diagnosed with a potentially fatal heart condition and was told never to exert himself again. Roosevelt's body was his weakness, the one hill he could never fully conquer—and as a result he developed what would become a lifelong obsession with athletics that he carried with him into his presidency. As President of the United States, Roosevelt boxed, practiced Ju-Jitsu, played tennis nearly every day, and frequently invited athletes and teams to the White House. It was during his administration that America saw baseball's first ever World Series; interscholastic sports began; and schools began to place an emphasis on physical education. In addition, the NCAA formed, and the United States hosted the Olympic Games for the first time. From a prize-winning historian, this book shows how Roosevelt fought desperately (and sometimes successfully) to shape American athletics in accordance with his imperialistic view of the world. It reveals that, in one way or another, we can trace our fanaticism for fitness and sports directly back to the twenty-sixth president and his relentless pursuit of "The Strenuous Life." "Essential reading for anyone who cares about the history of sports in America." —Michael Kazin, author of War against War: The American Fight for Peace, 1914–1918

It all began in Maranello, a small town south of Modena, Italy, where Enzo Ferrari founded a car factory that would conquer the realm of automobile enthusiasts for a long time to come. A love for Ferrari lasts a lifetime: anyone who has entered the magic triangle of power, speed, and beauty under the sign of the prancing horse remains captivated. This book presents all models in chronological order, from the Spider Touring of 1948 to the new LaFerrari of 2013. Includes the following models: 458 Italia FF F12berlinetta LaFerrari

This compendium of everything thats new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select whats safe, reliable, and fuel-frugal.

The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.
