2010 Polaris Sportsman 850 XP

This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author’s 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr.Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist’s loss of compassionate neutrality when treating a couple, and many more. Many of the “Clinical Pearls” prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Addressing Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy.

This edited volume proposes that an understanding of ASEAN – its development and institutionalization – is invaluable to our conception of international relations theory in the Asian context. Southeast Asia and ASEAN host peoples, ideas, institutions, and relations that contribute to a critical reassessment of theories in social sciences. In the field of IR, studies on transnational networks, diasporas, small states, middle powers, the role of history, and identity learn from Southeast Asian practices. ASEAN has long been established as an authoritative example of alternative ways of regional institutionalization. Besides empirical analysis, these fields can also benefit from their interactions with regional scholarly communities. This edited book offers an opportunity for a dialogue among scholarly communities on a variety of issues of which Southeast Asia and ASEAN provide ample opportunities for a critical analysis. This book will be of great interest to scholars of ASEAN, the broader Asian region, and for scholars of regionalism in general.

Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

The untold story of A-10 units in Operation Enduring Freedom reaches its conclusion with this second of two volumes focusing on the type's combat missions in Afghanistan. Featuring numerous first-hand accounts and photography from those who experienced the conflict, along with imagery from official military archives, this book offers a unique and detailed insight into the record of the A-10 in one of the 21st Century's most significant conflicts. Initially, the A-10 Thunderbolt was not a favourite of the USAF, which, prior to the Iraqi invasion of Kuwait in 1990, was hoping to shunt this Cold War relic onto the US Army and Marine Corps. But since then the 'Warthog', with its formidable armament, ruggedness and flexibility, has continually proven itself in combat and evolved into the world's premiere close support aircraft. In 2002 the Thunderbolt was at the forefront of Operation Enduring Freedom, the US occupation of Afghanistan.

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical “episodes” that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. The Open Access version of this book, available at https://www.taylorfrancis.com/books/9781003013518, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

WARNING SIRENS ARE BLARING. YOU HAVE 15 MINUTES TO EVACUATE. WHAT WILL YOU DO? Cataclysmic events strike sleepy towns and major cities every year. Residents face escaping quickly or perishing in rising waters, raging fires or other life-threatening conditions. By the time the evacuation starts, it's already too late. Being prepared makes the difference between survival and disaster. Guiding you step by step, Bug Out shows you how to be ready at a second's notice.
• Create an escape plan for where to go and how to get there.
• Pack the perfect bug-out bag for the first 72 hours.
• Find food, water and other necessities outside of civilization.
Floods. Hurricanes. Pandemics. Earthquakes. Blizzards. Tsunamis. Wildfires. Riots. Bug Out includes detailed information on the best escape locations everywhere in the U.S.:
• The Pacific Coast
• The Rocky Mountains
• The Desert Southwest
• The Heartland
• The Lakes and Big Woods of the North
• The Gulf Coast
• The Appalachians
• The Atlantic Coast

When William Carter gets the call that his best friend and his wife have been killed in a car accident, his entire life changes. He never expected anything to happen to his long-time best friend. It was why he'd promised to take care of his son Riley if anything ever happened to him. He never imagined he'd actually have to keep that promise. He takes the boy in, but he knows he isn't fit to be a parent. So, he hires someone to do the job for him. He thought it was for the best. Having his life change in the blink of an eye wasn't something Riley ever expected but he was grateful for it. He knew his parents would do what was best for him, which was why he lived every day of his life making them proud. When Riley graduates from college, he knows exactly what he wants to do with his life. So, he seeks out the man who has been financially taking care of him for most of his life. However, he didn't expect the instant attraction he felt at seeing William Carter for the first time in fifteen years. William is hesitant to give Riley a job at his office. Not because he isn't qualified but because he isn't sure he's capable of keeping his hands to himself. Riley grew up and he was more handsome than William could have imagined. Can they fight their attraction for one another in the workplace, or will they give in to their desires? Please Note: This book contains adult language and steamy adult activities, it is intended for 18+ Adults Only. Novel, approximately 30,000 words in length. HEA (happy ever after ending). Does not end with a "cliffhanger." Themes include: May/December, Office relationship, Forbidden love, Desire.

This book explores death in contemporary society – or more precisely, in the ‘spectacular age’ – by moving beyond classic studies of death that emphasised the importance of the death taboo and death denial to examine how we now ‘do’ death. Unfolding the notion of ‘spectacular death’ as characteristic of our modern approach to death and dying, it considers the new mediation or mediatisation of death and dying; the commercialisation of death as a ‘marketable commodity’ used to sell products, advance artistic expression or provoke curiosity; the re-ritualisation of death and the growth of new ways of finding meaning through commemorating the dead; the revolution of palliative care; and the specialisation surrounding death, particularly in relation to scholarship. Presenting a range of case studies that shed light on this new understanding of death in contemporary culture, *The Age of Spectacular Death* will appeal to scholars of sociology, cultural and media studies, psychology and anthropology with interests in death and dying.
