Projects series provides 10 ready-made projects designed to help students achieve higher levels of thinking and develop 21st-century skills. Projects are aligned to the Common Core State Standards, allowing students to explore and be creative as well as gain enduring understanding. Each project represents a type of performance assessment, including portfolios, oral presentations, research papers, and exhibitions. Included for each project is a suggested calendar to allow teacher scheduling, mini-lessons that allow students to build capacity and gain understanding, as well as multiple rubrics to objectively assess student performance. The lessons are presented in an easy-to-follow format, enabling teachers to implement projects immediately. Grades 3-5

Real-time strategies for real-life results! Are you struggling to balance your students' learning needs with their learning styles? William Bender's new edition of this teacher favorite is like no other. His is the only book that takes differentiated math instruction well into the twenty-first century, successfully blending the best of what technology has to offer with guidelines for meeting the objectives set forth by the Common Core. Every innovation in math instruction is addressed: Flipping math instruction Project-based learning Using Khan

Teaching for deeper conceptual understanding

Common Core Connections: Math is the perfect tool for helping third grade students master Common Core math skills. The Common Core Standards for Math in third grade focus on four main areas: multiplication and division within 100, developing an understanding of fractions, rectangular arrays and area, and two-dimensional shapes. This resource provides focused practice pages for targeting and reinforcing these and other third grade math skills while helping students connect comprehension with knowledge and application. Connecting the standards to content has never been easier with the Common Core Connections series for Math. The Common Core Connections series provides teachers with a skill assessment and analysis to help determine individualized instruction needs. Focused, comprehensive practice pages and self-assessments guide students to reflection and exploration for deeper learning! Standards correlations are printed on each page to make planning and documentation simple. This series is an ideal resource for differentiation and remediation. Each 96-page book includes a skill assessment, assessment analysis, Common Core State Standards Alignment Matrix, and answer key.

Presents an introduction to the framework of twenty-first century learning, covering the skills needed to thrive, including learning and innovations skills, digital literacy skills, and life and career skills.

Wanted for the global workforce: thinkers (and those who can teach them) Where K-12 instruction once centered on content and memorization, today's educators want, most of all, to teach their students to think critically and perceptively. What better way than with project-based learning (PBL)? Author Todd Stanley provides a teacher-friendly, step-by-step approach to implementing PBL, showing readers how to: Use project and classroom management skills to create a positive, productive learning environment Develop curriculum around ten different project types Link projects with today's standards Teach students how to effectively collaborate and bring out the best in each other

10 Performance-Based STEM Projects for Grades 6-8 provides 10 ready-made projects designed to help students achieve higher levels of thinking and develop 21st-century skills while learning about science, technology, engineering, and math.
