Consistent with previous editions of *An Introduction to Physical Science*, the goal of the new Thirteenth edition is to stimulate students' interest in and gain knowledge of the physical sciences. Presenting content in such a way that students develop the critical reasoning and problem-solving skills that are needed in an ever-changing technological world, the authors emphasize fundamental concepts as they progress through the five divisions of physical sciences: physics, chemistry, astronomy, meteorology, and geology. Ideal for a non-science majors course, topics are treated both descriptively and quantitatively, providing instructors the flexibility to emphasize an approach that works best for their

This volume presents transcripts of seven hearings held in May, 1991, on the reauthorization of the Higher Education Act of 1965. Of the hearings held in the District of Columbia the first focused on the Pell Grant and Stafford Loan programs and featured witnesses from around the country addressing educational finance. The second hearing focused on the process of accreditation, certification and licensing that determines institutional participation in the Federal student aid programs and featured witnesses from educational institutions, and professional associations. The final hearing presented the testimony of college executives, representatives of educational associations and others on Title VI (which supports international education) and Title III (concerned with institutional aid and funding for institutional facilities). The hearings in other cities provided an opportunity for legislators to hear additional suggestions and recommendations from students, teachers, administrators, institutional executives and state agencies on the reauthorization of higher education programs. Included are the prepared statements of the witnesses as well as additional statements, correspondence and supplemental material. (JB)
