How was it that ordinary men in medieval England and Wales became such skilled archers that they defeated noble knights in battle after battle? The archer in medieval England became a forerunner of John Bull as a symbol of the spirit of the ordinary Englishman. He had his own popular literature that left us a romantic version of the lives and activities of outlaws and poachers such as Robin Hood.This remarkable development began 150 years after the traumatic events of the Norman Conquest transformed the English way of life, in ways that were almost never to the benefit of the English. This book is the first account of the way ordinary men used bows and arrows in their day-to-day lives, and the way that their skills became recognised by the kings of England as invaluable in warfare.

' Arran Water ', the term for whisky distilled illicitly on the Isle of Arran, was revered for its quality throughout Scotland during the heydays of smuggling in the late 18th and early 19th centuries. Despite this reputation, Arran ' s rich distilling past has long been forgotten, cast into the shadows of more illustrious whisky-making neighbours such as Campbeltown and Islay. This pioneering book is the first to chart this fascinating aspect of the island ' s history. In Arran Water Gregor Adamson provides a comprehensive first-hand account of distilling on the island from the emergence of clandestine manufacture in the late 18th century to the construction of the new distillery at Lagg in 2018 by Isle of Arran Distillers which reinstated legal whisky production on the island after 160 years with the establishment of a distillery at Lochranza in 1995. Arran Water dispels the myths, hearsay and folktales that have distorted Arran ' s distilling story and provides a clear narrative, largely through primary research, which highlights the key role that illicit whisky production and smuggling played in the island ' s economic, social and cultural development. Using a vast array of original sources, Adamson outlines the manufacture, transportation, and consumption of sma ' still whisky, unearths the secrets of the hidden bothies of the Arran hills and glens, and describes the bloody battles fought between island smugglers and the Excise gaugers and Revenue Cuttermen. The author also explores the development of licensed whisky production on the island, from the lost legal distilleries of the 1790s and 1820s to the modern developments at Lochranza and Lagg.

Filters are used in most industries, especially the water, sewage, oil, gas, food and beverage, and pharmaceutical industries. The new edition of this established title is an all-encompassing practical account of standard filtration equipment and its applications. Completely revised and rewritten, it is an essential book for the engineer working in a plant situation-who requires guidance and information on what ' s available and whether it ' s suitable for the job. Co-published with the Institution of Chemical Engineers. Co-published with the Institution of Chemical Engineers. The leading practical engineering guide to filtration techniques, systems and their applications Meets the needs of all key sectors where filtration is a critical process, including chemical processing and manufacture, food, oil and gas, air-conditioning and water A comprehensive sourcebook and reference for plant engineers, process engineers, plant designers, filter media and filtration specialists and equipment specifiers

This Army tactics, techniques, and procedures (ATTP) manual provides doctrinal guidance and procedures that will enhance the delivery of human resources (HR) support in brigade and battalion S-1 sections. It will help HR leaders to guide actions and provide procedures to enable decision making. This publication is nested with Field Manual (FM) 1-0, Human Resources Support, and provides overarching doctrinal guidance and direction for conducting S-1 operations. ATTP 1-0.1 promotes a common understanding of HR support fundamentals at battalion, brigade, or brigade equivalent level S-1 sections throughout the Army Force Generation (ARFORGEN) cycle. This manual, along with FM 1-0, provides sufficient information to allow for execution of all required HR missions and functions dictated by current operational requirements and anticipated future actions. ATTP 1-0.1 provides the doctrinal base for developing operations plans (OPLANs) and associated standing operating procedures (SOPs). Leaders and HR operators at all levels must apply these fundamentals using the military decision-making process (MDMP); troop leading procedures; and mission, enemy, terrain and weather, troops and support available, time available, civil considerations (METT-TC). This publication is an authoritative guide that requires judgment in application. ATTP 1-0.1 was previously published as Field Manual Interim 1-0.1 to address the Army's HR transformation concept and the transition to Personnel Services Delivery Redesign (PSDR), which transferred and consolidated HR functions at brigade and battalion-level. This transition supported Army transformation from large, powerful fixed organizations, typically a division, to a brigade-centric design based on smaller, more self-contained organizations. Likewise, the S-1 structure was enhanced to support S-1 operations throughout all force pools of ARFORGEN, and S-1s now have the capabilities and resources to plan, coordinate, and execute all HR support core competencies and their subordinate key functions and tasks. HR transformation will impact S-1 sections as strategic objectives, structures, and processes change. These changes include—Reshaping HR processes and business practices; Using technology to apply a relevant, reliable, and achievable multi-component HR system; Realigning Army HR structures to meet needs and capabilities; Revising doctrine and training to integrate best practices and lessons learned; Delivering and executing HR service functions as close to Soldiers as possible; Continuing to build on the ability to provide support from home station. While the focus of this manual is on S-1 sections assigned to modified table of organization and equipment (MTOE) units, it also applies to tables of distribution and allowances (TDA) organizations and the support agencies (Installation Management Command [IMCOM]). IMCOM HR support to MTOE units in garrison is limited. Regardless of the type of organization or whether the unit is deployed or not deployed, providing effective and efficient HR support relies on trained HR professionals at all levels that can coordinate necessary HR support when needed.

The development of polymeric materials in the form of geosynthetics has brought major changes to the area of Civil Engineering. Increasing interest in these materials and their use has resulted in significant advances in their practical applications in the last few decades. Following this progress, geosynthetics have become a common and favoured co

This volume focuses on the new and diversifying interactions between civil society and the state in contemporary East Asia by including cases of entanglement and contention in the three fully consolidated democracies in the area: Japan, South Korea and Taiwan. The book argues that all three countries have reached a new era of post high-growth and mature democracy, leading to new social anxieties and increasing normative diversity, which have direct repercussions on the relationship between the state and civil society. It introduces a comparative perspective in identifying and discussing similarities and differences in East Asia based on in-depth case studies in the fields of environmental issues, national identities as well as neoliberalism and social inclusion that go beyond the classic dichotomy of state vs "liberal" civil society.

The role of the modern automotive technician has changed drastically in the past decade. The job of today's vehicle specialist involves a deep knowledge of a wide variety of technical disciplines. Few professions encompass such a diverse understanding of technology. The automotive technician is now expected to know about chemistry, electronics, mechanics, optics, as well as possess a deep analytical mind. The last only comes with time and experience.
