A Case of Exploding Mangoes is a comic novel by the Pakistani writer Mohammed Hanif based on the 1988 plane crash that killed General Muhammad Zia ul-Haq, former president of Pakistan. The book received generally positive reviews from critics. It won the Commonwealth Foundation's Best First Book prize in 2009, and was shortlisted for the Guardian First Book Award.

A Case of Exploding Mangoes - Wikipedia

When a dead whale was beached in Florence, Oregon in 1970, officials had to decide how to dispose of it. Cue highway engineer Paul Thornton, who had the idea of using dynamite to explode the carcass. Thornton had intended for the pieces to drift away harmlessly into the sea, but things didn't quite work out that way.

Mohammed Hanif's comic novel A Case of Exploding Mangoes (2008) is based on the true events of the 1988 plane crash that killed the former president of Pakistan, General Muhammad Zia ul-Haq. The story follows Ali Shigri, a junior officer in the Pakistani Air Force, as he seeks to assassinate General Zia in revenge for the death of his father.

A Case of Exploding Mangoes Summary | SuperSummary

A Case Of Exploding Mangoes is a Pakistani journalist's extremely witty fictional spin on his country's politics, army (which have, throughout its history, often been the same thing) and its de-facto head of state, General Muhammad Zia-ul-Haq. As one may often note, good fiction is often just a tool to shed light on the truth, and this book, in many ways, does just that.

The Strange Case of the Exploding Student Workload. By Jody Greene . A couple of weeks ago, I opened up my work email at the start of the day and found a query from a colleague who works in student learning support. I work in faculty development and direct a teaching center, and her question is one I've been asked dozens of times over the ...

Guest Post: The Strange Case of the Exploding Student ...

A Case of Exploding Mangoes, discusses the highly bitter facts of Pakistan's history and dictatorship era in a very light and fun way, but touching all the sensitivity of the topic without a fear. The writer no doubt knows the thirst of reader for exploring the truth dumped underneath the heavy boots steps of military dictatorship and dirty games of bureaucrats.

A Case of Exploding Mangoes is a 2008 novel by Pakistani writer Mohammed Hanif. In the final months before his suspicious death by plane crash, Pakistani dictator General Zia ul-Haq grows increasingly paranoid.

In August 1988, Zia gets into the presidential plane, Pak One, which explodes midway. Who killed him? The army generals growing old waiting for their promotions, the CIA, the ISI, RAW, or Ali Shigri, a junior officer at the military academy whose father, a whisky-swilling jihadi colonel, was murdered by the army? A Case of Exploding Mangoes is sharp, black, inventive, and utterly gripping. It marks the debut of a brilliant new writer.

Teasing, provocative, and very funny, Mohammed Hanif's debut novel takes one of the subcontinent's enduring mysteries and out if it spins a tale as rich and colourful as a beggar's dream. Why did a Hercules C130, the world's sturdiest plane, carrying Pakistan's military dictator General Zia ul Haq, go down on 17 August, 1988? Was it because of: 1. Mechanical failure 2. Human error 3. The CIA's impatience 4. A blind woman's curse 5. Generals not happy with their pension plans 6. The mango season Or could it be your narrator, Ali Shigri? Here are the facts: • A military dictator reads the Quran every morning as if it was his daily horoscope. • Under Officer Ali Shigri carries a deadly message on the tip of his sword. • His friend Obaid answers all life's questions with a splash of eau de cologne and a quote from Rilke. • A crow has crossed the Pakistani border illegally. As young Shigri moves from a mosque hall to his military barracks

before ending up in a Mughal dungeon, there are questions that haunt him: What does it mean to betray someone and still love them? How many names does Allah really have? Who killed his father, Colonel Shigri? Who will kill his killers? And where the hell has Obaid disappeared to?

A Washington Post, Rocky Mountain News, Boston Globe Best Book of the Year Intrigue and subterfuge combine with bad luck and good in this darkly comic debut about love, betrayal, tyranny, family, and a conspiracy trying its damndest to happen. Ali Shigri, Pakistan Air Force pilot and Silent Drill Commander of the Fury Squadron, is on a mission to avenge his father's suspicious death, which the government calls a suicide. Ali's target is none other than General Zia ul-Haq, dictator of Pakistani. Enlisting a rag-tag group of conspirators, including his cologne-bathed roommate, a hash-smoking American lieutenant, and a mango-besotted crow, Ali sets his elaborate plan in motion. There's only one problem: the line of would-be Zia assassins is longer than he could have possibly known.

This "splendidly satirical novel" by the award-winning Pakistani author "beautifully captures the absurdity and folly of war and its ineluctable impact" (Booklist, starred review). An American pilot crash lands in the desert and finds himself on the outskirts of the very camp he was supposed to bomb. After days spent wandering and hallucinating from dehydration, Major Ellie is rescued by one of the camp's residents, a teenager named Momo, whose money-making schemes are failing while his family falls apart. His older brother left for his first day of work at an American base and never returned; his parents are at each other's throats; his dog is having a very bad day; and a well-meaning aid worker has shown up wanting to research him for her book on the Teenage Muslim Mind. To escape the madness, Momo sets out to search for his brother, and hopes his new Western acquaintances might be able to help find him. But as the truth of Ali's whereabouts begin to unfold, the effects of American "aid" on this war-torn country are revealed to be increasingly pernicious. In *Red Birds*, acclaimed author Mohammed Hanif reveals critical truths about the state of the world with his trademark wit and keen eye for absurdity.

From the author of the universally acclaimed debut novel *A Case of Exploding Mangoes*: a subversive, often shockingly funny new novel set in steaming Karachi, about second chances, thwarted ambitions, and love in the most unlikely places. The patients of the Sacred Heart Hospital for All Ailments need a miracle, and Alice Bhatti may be just what they're looking for. She's the new junior nurse, but that's the only thing ordinary about her. Her father is a part-time healer in the French Colony, Karachi's Christian slum--and it seems she has inherited his part-time gift. With a bit of begrudging but inspired improvisation, Alice brings succour to the patients lining the hospital's corridors. Yet, a Christian in an Islamic world, she is ensnared in the red tape of hospital bureaucracy, trapped by the caste system, and torn between her duty to her patients, her father, and her husband--an apprentice to the nefarious "Gentlemen's Squad" of the police, and about to plunge them both into a situation so dangerous that perhaps not even a miracle can save them. But, of course, Alice Bhatti is no ordinary nurse...

Bogs, brains and bonkersness make this the perfect read for fans of David Walliams, Simon Mayo and Liz Pichon. Shortlisted for both the Redbridge Children's Book Award and the Leeds Book Awards 2014 and WINNER of Worcestershire's Awesomest Book! award Quirky twelve-year-old Noelle Hawkins may be the brightest student in her class, but even she is completely miffed to explain how her dad, wacky scientist Brian, "Big Brain" Hawkins, spontaneously combusted while sitting in a portaloo. It's true that he was working on a new top secret Brain Ray machine and was on the point of a great break-through . . . could this have had something to do with it? Know-All is sure all is not as it seems. With the help of her grumpy sister, Holly, she is determined to find out what really happened to her dad! 'The ideal read for anyone who loves a mystery (in a toilet)' Sunday Express

"Delightfully horrifying."--Popular Science One of Mental Floss's Best Books of 2018 One of Science Friday's Best Science Books of 2018 This wryly humorous collection of stories about bizarre medical treatments and cases offers a unique portrait of a bygone era in all its jaw-dropping weirdness. A puzzling series of dental explosions beginning in the nineteenth century is just one of many strange tales that have long lain undiscovered in the pages of old medical journals. Award-winning medical historian Thomas Morris delivers one of the most remarkable, cringe-inducing collections of stories ever assembled. Witness Mysterious Illnesses (such as the Rhode Island woman who peed through her nose), Horrifying Operations (1781: A French soldier in India operates on his own bladder stone), Tall Tales (like the "amphibious infant" of Chicago, a baby that could apparently swim underwater for half an hour), Unfortunate Predicaments (such as that of the boy who honked like a goose after inhaling a bird's larynx), and a plethora of other marvels. Beyond a series of anecdotes, these painfully amusing stories reveal a great deal about the evolution of modern medicine. Some show the medical profession hopeless in the face of ailments that today would be quickly banished by modern drugs; but others are heartening tales of recovery against the odds, patients saved from death by the devotion or ingenuity of a conscientious doctor. However embarrassing the ailment or ludicrous the treatment, every case in *The Mystery of the Exploding Teeth* tells us something about the knowledge (and ignorance) of an earlier age, along with the sheer resilience of human life.

Hey, did you hear the one about the man who dropped a lit cigarette into the toilet with some gasoline-soaked rags? Of course you did, it happened to your gym teacher's cousin. Or was it your cousin's gym teacher?

Lacking a digital crystal ball, we cannot predict the future of education or the precise instructional role games will have going forward. Yet we can safely say that games will play some role in the future of K-12 and higher education, and members of the games community will have to choose between being passive observers or active, progressive contributors to the complex and often political process of weaving together pedagogy, technology, and culture. This will involve agreeing that games--or, more specifically, game mechanics and the engagement in joyful learning that they engender--are not only critical for shaping online and classroom instruction but also the evolution of schooling as a whole. Likewise, it will involve a hard push beyond questions like "Are video games 'good' or 'bad' for education?" and "Are games 'better' for all students than traditional face-to-face teaching" to unpack how game experiences vary with individual learner goals as an interaction with the parameters of an educational environment. Simply put, we need to form a cohesive, compelling argument in support of the notion that games are entire learning ecologies in and of themselves. This edited volume is designed to anchor collective thinking with respect to the value-added nature of games for learning and the complexities involved in player experience, narrative context, and environmental?player interactions. As could be expected, we are not interested in debates about "gamification," game violence, individual game quality, and other topics that have become standard fare in extant games literature. Instead, we seek to emphasize issues of scalability, the induction of player goal adoption, affordances of game-based instructional environments, relationships between play and transfer, and the value of games as part of an ecopsychological worldview. As long-time contributors in a field that has made a habit of playing it safe--pun intended--we seek to bring the dialogue in a more nuanced and meaningful direction that will reach teachers, researchers, designers, and players alike.
