" A stunning picture of a black woman ' s coming of age in America. Put it on the shelf beside The Autobiography of Malcolm X. " —Kirkus Reviews Elaine Brown assumed her role as the first and only female leader of the Black Panther Party with these words: " I have all the guns and all the money. I can withstand challenge from without and from within. Am I right, Comrade? " It was August 1974. From a small Oakland-based cell, the Panthers had grown to become a revolutionary national organization, mobilizing black communities and white supporters across the country—but relentlessly targeted by the police and the FBI, and increasingly riven by violence and strife within. How Brown came to a position of power over this paramilitary, male-dominated organization, and what she did with that power, is a riveting, unsparring account of self-discovery. Brown ' s story begins with growing up in an impoverished neighborhood in Philadelphia and attending a predominantly white school, where she first sensed what it meant to be black, female, and poor in America. She describes her political awakening during the bohemian years of her adolescence, and her time as a foot soldier for the Panthers, who seemed to hold the promise of redemption. And she tells of her ascent into the upper echelons of Panther leadership: her tumultuous relationship with the charismatic Huey Newton, who would become her lover and her nemesis; her experience with the male power rituals that would sow the seeds of the party's demise; and the scars that she both suffered and inflicted in that era ' s paradigm-shifting clashes of sex and power. Stunning, lyrical, and acute, this is the indelible testimony of a black woman ' s battle to define herself. " A glowing achievement. " —Los Angeles Times " Honest, funny, subjective, unsparring, and passionate. . . A Taste of Power weaves autobiography and political history into a story that fascinates and illuminates. " —The Washington Post

Since the founding of the United States, culinary texts and practices have played a crucial role in the making of cultural identities and social hierarchies. A Taste of Power examines culinary writing and practices as forces for the production of social order and, at the same time, points of cultural resistance. Culinary writing has helped shape dominant ideas of nationalism, gender, and sexuality, suggesting that eating right is a gateway to becoming an American, a good citizen, an ideal man, or a perfect wife and mother. In this brilliant interdisciplinary work, Katharina Vester examines how cookbooks became a way for women to participate in nation-building before they had access to the vote or public office, for Americans to distinguish themselves from Europeans, for middle-class authors to assert their class privileges, for men to claim superiority over women in the kitchen, and for lesbian authors to insert themselves into the heteronormative economy of culinary culture. A Taste of Power engages in close reading of a wide variety of sources and genres to uncover the intersections of food, politics, and privilege in American culture.

In an extraordinary social history, Leora Auslander explores the changing meaning of furniture from the mid 17th to the early 20th century, revealing how the aesthetics of everyday life were as integral to political events as to economic and social transformations. The book is enriched by the author's experience as a cabinetmaker. 68 photos.

A tense and atmospheric short story from the author of the brilliant debut NORTH OF BOSTON - a riveting thriller readers of Laura Lipmann, Dennis Lehane and Harlan Coben should be sure not to miss! Desperate to escape Gaston, a New England institution to which troublesome young adults are banished by their wealthy parents, Louisa Chambers is willing to pay any sum for a get-out pass. But then the price for her therapist's backing becomes sexual favours, and Louisa finds herself trapped in a nightmare. Pirió Kasparov's a hair's breadth from freedom herself, but she's won't leave Louisa at the mercy of a man happy to exploit his power over vulnerable young women. But Pirió's plan will have startling consequences...

The explicit association between food and status was, academically speaking, first acknowledged on the food production level. He who owned the land, possessed the grain, he who owned the mill, had the flour, he who owned the oven, sold the bread. However, this conceptualization of power is dual; next to the obvious demonstration of power on the production level is the social significance of food consumption. Consumption of rich food " in terms of quantity and quality " was, and is, a means to show one's social status and to create or uphold power. This book is concerned with the relationship between food consumption, status and power. Contributors address the 'old top' of society, and consider the way kings and queens, emperors and dukes, nobles and aristocrats wined and dined in the rapidly changing world of the late eighteenth and nineteenth centuries, where the bourgeoisie and even the 'common people' obtained political rights, economic influence, social importance and cultural authority. The book questions the role of food consumption at courts and the significance of particular foodstuffs or ways of cooking, deals with the number of guests and their place at the table, and studies the way the courts under consideration influenced one another. Topics include the role of sherry at the court of Queen Victoria as a means of representing middle class values, the use of the truffle as a promotional gift at the Savoy court, and the influence of European culture on banqueting at the Ottoman Palace. Together the volume addresses issues of social networks, prestige, politics and diplomacy, banquets and their design, income and spending, economic aims, taste and preference, cultural innovations, social hierarchies, material culture, and many more social and cultural issues. It will provide a useful entry into food history for scholars of court culture and anyone with an interest in modern cultural history.

What it was like to be as rich as Rockefeller: How a house gave shape and meaning to three generations of an iconic American family One hundred years ago America's richest man established a dynastic seat, the granite-clad Kykuit, high above the Hudson River. Though George Vanderbilt's 255-room Biltmore had recently put the American country house on the money map, John D. Rockefeller, who detested ostentation, had something simple in mind—at least until his son John Jr. and his charming wife, Abby, injected a spirit of noblesse oblige into the equation. Built to honor the senior Rockefeller, the house would also become the place above all others that anchored the family's memories. There could never be a better picture of the Rockefellers and their ambitions for the enormous fortune Senior had settled upon them. The authors take us inside the house and the family to observe a century of building and rebuilding—the ebb and flow of events and family feelings, the architecture and furnishings, the art and the gardens. A complex saga, The House the Rockefellers Built is alive with surprising twists and turns that reveal the tastes of a large family often sharply at odds with one another about the fortune the house symbolized.

"A narrative that crackles with tension and enormous empathy. . . . Extraordinarily powerful." —Publishers Weekly Through the story of a thirteen-year-old black boy condemned to life in prison, Elaine Brown exposes the "New Age" racism that effectively condemns millions of poor African-Americans to a third world life. The story of "Little B" is riveting, a stunning example of the particular burden racism imposes on black youths. Most astonishing, almost all of the officials involved in bringing him to "Justice" are black. Michael Lewis was officially declared a ward of the state at age eleven, and then systematically ignored until his arrest for murder. Brown wondered how this boy could possibly have aroused so much public resentment, why he was being tried (and roundly condemned, labeled a "super-predator") in the press. Then she met Michael and began investigating his case on her own. Brown adeptly builds a convincing case that the prosecution railroaded Michael, looking for a quick, symbolic conviction. His innocence is almost incidental to the overwhelming evidence that the case was unfit for trial. Little B was convicted long before he came to court, and effectively sentenced years before, when the "safety net" allowed him to slip silently down. Brown cites studies and cases from all over America that reveal how much more likely youth of color are to be convicted of crimes and to serve long—even life—sentences, and how deeply the new black middle class is implicated in this devastating reality.

An examination of the rise of tabloid television and the political, cultural, and technological changes that have enabled its success.
