FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS, 10E makes it easy to demonstrate that accounting is a powerful tool for business decision-making by going beyond debits and credits and keeping students focused on the big picture. For example, journal entries require students to demonstrate the balance sheet and income statement impact of transactions, helping students see how business events ultimately impact the financial statements. In addition to exposing students to annual reports of highly recognizable companies such as Nike, Porter's exclusive Ratio Decision-Model provides students with a framework for reading and interpreting financial statements to make decisions. The focus on financial statements and decision-making carries through to the end-of-chapter with a suite of case materials that have students reading and interpreting financial statements. There still remains one last major opportunity to take out costs - through the supply chain. Ultimately all costs will make their way to the final marketplace to be reflected in the price paid by the end user. Smart companies instead seek to make the supply chain more competitive through the value it creates and the costs it reduces overall. They have realised that the real competition is not company against company but rather supply chain against supply chain. Supply Chain Management Accounting looks at how the evolution of supply chains has been dramatic over the last few years, with more and more companies moving to sourcing overseas, distributing finished goods to
