The arrival and popularity of multi-core processors has sparked a renewed interest in the development of parallel programs. Similarly, the availability of low-cost microprocessors and sensors has generated a great interest in embedded real-time programs. This book provides students and programmers whose backgrounds are in traditional sequential programming with the opportunity to expand their capabilities into parallel, embedded, real-time and distributed computing. It also addresses the theoretical foundation of real-time scheduling analysis, focusing on theory that is useful for actual applications. Written by award-winning educators at a level suitable for undergraduates and beginning graduate students, this book is the first truly entry-level textbook in the subject. Complete examples allow readers to understand the context in which a new concept is used, and enable them to build and run the examples, make changes, and observe the results.

with Disabilities Act Standards for Accessible Design Applying the ADA helps architects and developers understand better how the rules for eliminating barriers in the built environment apply to everyday life and how to best implement them in the design and construction of a broad variety of buildings and facilities. By showing how The 2010 Americans with Disabilities Act Standards for Accessible Design have been applied in various contexts and building types, this extensively illustrated guide helps readers quickly understand the requirements of the standards and how to apply them to both new construction and renovation. Written by an architect who consults regularly on accessibility issues for design professionals, building owners, and facility managers, this user-friendly guide features 100 photos and 150 drawings that take the guesswork out of applying the standards to real-world projects. Building types covered include: Healthcare and senior living facilities and hospitals College and university facilities Elementary and high schools Hotels and other transient lodging facilities Amusement parks and play areas Historic preservation and remodels Retail and office spaces Applying the ADA is an indispensable resource for architects, interior designers, owners, developers, and facility managers. It is also important reading for students of architecture and interior design.

From Emily Calandrelli—Emmy-nominated host of Xploration Outer Space, correspondent on Bill Nye Saves the World, and graduate of MIT—comes the fifth novel in a fun illustrated chapter book series about an eight-year-old girl with a knack for science, math, and solving mysteries with technology. Third grader and inventor extraordinaire Ada Lace is on spring break. But it's just a little less relaxing than she'd imagined. Nina is beside herself with excitement about meeting her favorite artist and enlists Ada and Mr. Peebles's coding-whiz nephew to help revamp her online portfolio. When Nina finally meets Miroir, he snubs her, and her confidence is shaken—but not enough to miss the art show opening. While there,

Ada spots a suspiciously familiar painting that may mean Miroir isn't the original he claims to be. Will the friends be able to reveal the artist's true nature, before he fools someone else?

This report is based on the public hearing on the Americans with Disabilities Act which the U.S. Commission on Civil Rights held on November 12-13, 1998 to "investigate how the ADA was accomplishing its objectives of ensuring equality, independence, and freedom for people with disabilities"--P iii

Ada Howard, the wife of the preacher at Nashville's Full Love Baptist Tabernacle, has a whole lot of people to take care of. There's her husband, of course, and the flock that comes with him, plus the kids at the day care centre where she works, two grown daughters, and two ailing, wayward parents. It's no wonder she can't find time to take care of herself. And her husband's been so busy lately she's suspicious some other woman may be taking care of him... Then it comes: the announcement of her twenty-five-year college reunion in twelve months' time, signed with a wink by her old campus flame. It sets Ada thinking about the thrills of young love lost, and the hundred or so pounds gained since her college days, and she decides it's high time to change her body, and her life. So she starts laying down some rules. The first rule is: Don't Keep Doing What You've Always Been Doing. And so begins her unforgettable journey on the way to less weight and more love... For anyone who has ever found themselves at a crossroads, with one hand in their pocket and the other in the cookie jar, Ada's Rules is a warm, funny and soulfully wise novel about falling back in love with the life you have.
