First published in 1937. The Book of Songs is a collection of ancient Chinese songs, dating from 800 to 600 B.C. Until this was published in 1937 it had not been translated into English since the middle of nineteenth century, when sinology was still in its infancy. For the first time the original meaning of 290 out of the 305 songs is given, use being made of the advances in the study of old Chinese. The result is not merely a clear picture of early Chinese life, but also the restoration to its proper place in world literature of one of the finest collection of traditional songs.

From the universally admired, National Book Award-winning, bestselling author of *Waiting*—a timely novel that follows a famous Chinese singer severed from his country, as he works to find his way in the United States At the end of a U.S. tour with his state-supported choir, popular singer Yao Tian takes a private gig in New York to pick up some extra cash for his daughter’s tuition fund, but the consequences of his choice spiral out of control. On his return to China, Tian is informed that the sponsors of the event were supporters of Taiwan’s secession, and that he must deliver a formal self-criticism. When he is asked to forfeit his passport to his employer, Tian impulsively decides instead to return to New York to protest the government’s threat to his artistic integrity. With the help of his old friend Yabin, Tian’s career begins to flourish in the United States. But he is soon placed on a Chinese government blacklist and thwarted by the state at every turn, and it becomes increasingly clear that he may never return to China unless he denounces the freedoms that have made his new life possible. Tian nevertheless insists on his identity as a performer, refusing to give up his art. Moving, important, and strikingly relevant to our times, *A Song Everlasting* is a story of hope in the face of hardship from one of our most celebrated authors.

If Amazon can't win in China, can anyone? When Amazon CEO Jeff Bezos visited China in 2007, he expected that one day soon China would be a double-digit percentage of Amazon's sales. Yet, by 2019, Amazon, the most powerful and successful ecommerce company in the world, had quit China. In *Winning in China: 8 Stories of Success and Failure in the World's Largest Economy*, Wharton experts Lele Sang and Karl Ulrich explore the success and failure of several well-known companies, including Hyundai, LinkedIn, Sequoia Capital, and InMobi, as more and more businesses look to reap profits from the demand of 1.4 billion people. Sang, Global Fellow at the Wharton School of the University of Pennsylvania, and Ulrich, Vice Dean of Entrepreneurship and Innovation at the Wharton School, answer four critical questions: Which factors explain the success (or failure) of foreign companies entering China? What challenges and pitfalls can a company entering China expect to encounter? How can a prospective entrant realistically assess its chances? Which managerial decisions are critical, and which approaches are most effective? Sang and Ulrich answer these questions by examining the stories of eight well-known and respected companies that have entered China. They study: How Norwegian Cruise Line's entry into China displays how cultural differences can boost or sink different companies; How Intel, one of the oldest, most respected firms in Silicon Valley, thrived in a country that seems to favor agile startups; How Zegna, the Italian luxury brand, has emerged as another surprising success story and how it plans to navigate new headwinds from the COVID-19 pandemic. Through these engaging and illuminating stories, Sang and Ulrich offer a framework and
