biographer chronicles his meteoric rise and confounding fall, with an afterword containing newly discovered details about Fischer ' s life. Possessing an IQ of 181 and remarkable powers of concentration, Bobby Fischer memorized hundreds of chess books in several languages, and he was only thirteen when he became the youngest chess master in U.S. history. But his strange behavior started early. In 1972, at the historic Cold War showdown in Reykjavik, Iceland, where he faced Soviet champion Boris Spassky, Fischer made headlines with hundreds of petty demands that nearly ended the competition. It was merely a prelude to what was to come. Arriving back in the United States to a hero ' s welcome, Bobby was mobbed wherever he went—a figure as exotic

Commercial sponsorship offers poured in, ultimately topping \$10 million—but Bobby demurred. Instead, he began tithing his limited money to an apocalyptic religion and devouring anti-Semitic literature. Bobby reemerged in 1992 to play Spassky in a multi-million dollar rematch—but when the dust settled, he was a wanted man, transformed into an international fugitive because of his decision to play in Montenegro despite U.S. sanctions. discovery as we meet the clever, social birds of prey called caracaras, which puzzled Darwin, fascinate modern-day falconers, and carry secrets of our planet's deep past in their family history. In 1833, Charles Darwin was astonished by an animal he met in the Falkland Islands: handsome, social, and oddly crow-like falcons that were tame and inquisitive . . . quarrelsome and passionate, and so insatiably curious that they stole hats, compasses, and other valuables from the crew of the Beagle. Darwin wondered why these birds were confined to remote islands at the tip of South America, sensing a larger story, but he set this mystery aside and never returned to it. Almost two hundred years later, Jonathan Meiburg takes up this chase. He takes us through South America, from the

fog-bound coasts of Tierra del Fuego to the tropical forests of Guyana, in search of these birds: striated caracaras, which still exist, though they're very rare. He reveals the wild, fascinating story of their history, origins, and possible futures. And along the way, he draws us into the life and work of William Henry Hudson, the Victorian writer and naturalist who championed caracaras as an unsung wonder of the natural world, and to falconry parks in the English countryside, where captive caracaras perform incredible feats of memory and problem-solving. *A Most Remarkable Creature* is a hybrid of science writing, travelogue, and biography, as generous and accessible as it is sophisticated, and absolutely riveting.
