The Architect's Legal Handbook is the most widely used reference on the law for practicing architects and the established textbook on law for architectural students. Since the last edition of this book in 2010, the legal landscape in which architecture is practised has changed significantly; the long-standing procurement model with an architect as contract administrator has been challenged by the growing popularity of design and build contracts, contract notices in place of certificates, and novation of architect's duties. The tenth edition features all the latest developments in the law which affect an architect's work, as well as providing comprehensive coverage of relevant UK law topics. Key highlights of this edition include: an overview of the legal environment, including contract, tort, and land law; analysis of the statutory framework, including planning law, health and safety, construction legislation, and building regulations in the post-Grenfell legal landscape; procurement and the major industry construction contract forms; building dispute resolution, including litigation, arbitration, adjudication, and mediation; key fields for the architect in practice, including architects' registration and professional conduct, contracts with clients and collateral warranties, liability in negligence, and insurance; entirely new chapters on various standard form contracts, architects' responsibility for the work of others, disciplinary proceedings, and data protection; tables of cases, legislation, statutes, and statutory instruments give a full overview of references cited in the text. The Architect's Legal Handbook is the essential legal reference work for all architects and students of architecture.

Previous ed.: Oxford: Elsevier Architectural, 2004.

A range of factors are all combining to propel input cost inflation. Higher international logistic costs, returning demand from industry workload, and higher global metals prices are some of the ingredients to quicker building cost inflation. Whilst some EU materials exporters to the UK are adjusting to Brexit, other EU exporters – initially smaller or specialist firms hit proportionally harder – are now deciding not to supply the UK at all, because the additional red tape involved makes it not commercially viable. If this trend replicates across the whole EU to UK supply chain, visible disruption and higher prices are likely until other sources of supply begin to increase in volume and step in to address these supply issues. Among other exporters continuing to supply the UK, significant price increases are being applied to cover the permanent Brexit non-tariff barriers and additional administrative processes. SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2022, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year (2015 = 100), gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding £4,000,000 in value. Use the access code inside the front cover of the book to get set up with an ebook of this 2022 edition on the VitalSource® Bookshelf platform, available for access and use until the end of December 2022. As well as an overhaul of prices, 145 new items have been added including: Two new Cost Models for school refurbishment Primary Healthcare Fit-Out Plus, expanded range of cast iron rainwater goods expanded range of matwells expanded range of vinyl floor finishes Ecotherm insulation Along with the standard features you have come to expect from SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK: 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups Hundreds of alternative materials prices for the more unusual items Detailed guidance on wage rates, daywork, cost limits and allowances, property insurance and professional fees, plus useful formulae, design criteria and trade association addresses Updates, free of charge, twice a year – see inside for registration details. Updates are available online at www.pricebooks.co.uk

A little book that's big on information, the Architect's Legal Pocket Book is the definitive reference guide on legal issues for architects and architectural students. This handy pocket guide covers key legal principles which will help you to quickly understand the law and where to go for further information. Now in its third edition, this bestselling book has been fully updated throughout to provide you with the most current information available. Subjects include contract administration, building legislation, planning, listed buildings, contract law, negligence, liability and dispute resolution. This edition also contains new cases and legislation, government policy, contract terms and certificates including the RIBA contract administration certificates, inspection duties and practical completion, The Building a Safer Future, Proposals for Reform of the Building Safety Regulatory System Report, the Hackitt review, the Report of the Independent Inquiry into the Construction of Edinburgh Schools and practical issues facing architects. Illustrated with clear diagrams and featuring key cases, this is a comprehensive guide to current law for architects and an invaluable source of information. It is a book no architect should be without.

Architect's Legal Handbook: The Law for Architects, Fifth Edition is a collection of papers including those on International Work by Architects, on European community Law affecting Architects, and the Architects' Professional Indemnity Insurance. This collection is a comprehensive guideline to laws in England, Scotland, and the European community. This handbook seeks to make architects more aware of where possible legal pitfalls may lurk. Coverage is updated to include changes in English Law, Scottish Law, English Law of Contract, the Law of Tort, Architect's Appointment and Collateral Warranties, Architects' Liability, English and Scottish Land Laws, and the Standard Building Contracts in England. The origins and sources of the laws and the basic principles are explained, which guide the reader into how these are applied in the architects' relations with their clients and clients; contractors. A wider discussion is given on the topic of collateral warranties, incorporation options, and legal organizations such as partnerships and limited companies. Upon the formation of the European Community, institutions and treaties have arisen, so a review of technical harmonization and standards, right of establishment and freedom to provide services, product liability, and consumer protection is provided in order. The international workplace for British architects is also discussed, covering most countries in Europe. This collection of papers will prove useful for architects and engineers, especially those who want to put up their own architectural firms. The book can be likewise an informative source for architectural students, lawyers, and professors in business and commercial law.

Professional Practice for Landscape Architects third edition deals with the practical issues of being a successful landscape architect professional. Endorsed by the Landscape Institute, this book is an indispensable guide for licentiate members of the Institute on their Pathway to Chartership. It follows the revised 2013 syllabus covering all aspects of professional judgement, ethics and values, the legal system, organisation and management, legislation and the planning system, environmental policy and control, procurement and implementation. It also serves as a reminder and reference for fully qualified professionals in their everyday practice and for landscape students. Valuable information is presented in an easy to follow manner with diagrams and schedules, key acts, professional documents and contracts clearly explained and made easy to understand. A handy list of questions are included to aid with P2C revision, answers of which are found within the text.

A practical guide which provides a route map through the legal and contractual maze of everyday architectural practice. Clear flow-charts, checklists, guides to action and sample documents enable the reader to find essential information at a glance. Highly selective bibliographies list precise references for more detailed study. This fifth edition has been comprehensively revised to deal with the recent changes in legislation and protocol and includes a new section on adjudication. * Gives you all the basic knowledge needed to cope with legal and professional issues * Includes clear flow-charts, checklists, guides to action and sample documents that enable the reader to find essential information at a glance * Comprehensive, concise, simplified source of practical information

Running your own practice can bring immense joy satisfaction, but it is not without its risks. Do you have all the information at hand to set up confidently on your own? Comprehensive, accessible and easy to use, Starting a Practice helps architects navigate the pitfalls associated with establishing a successful business. This fully updated 3rd edition is mapped to the RIBA Plan of Work 2020 and approaches starting a business as if it were a design project, complete with briefing, sketching layouts and delivery. It features new material on professionalism and ethics, sustainable development and achieving a net-zero carbon emission built environment. Invaluable for Part 3 students, early practitioners and those considering setting up from scratch or wanting to consolidate an existing business, Starting a Practice gives architects the tools they need to thrive when setting out alone. Features essential guidance on: Preparing a business plan Choosing the right company structure Setting aspirations Monitoring finances Getting noticed Securing work Retaining and developing staff Planning for disaster.
