

Aspect And Modality 1 The Progressive And The Imperfective

Thank you for downloading aspect and modality 1 the progressive and the imperfective. Maybe you have knowledge that, people have look hundreds times for their favorite books like this aspect and modality 1 the progressive and the imperfective, but end up in harmful downloads. Rather than reading a good book with a cup of coffee in the afternoon, instead they are facing with some infectious bugs inside their laptop.

aspect and modality 1 the progressive and the imperfective is available in our book collection an online access to it is set as public so you can download it instantly. Our book servers saves in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Kindly say, the aspect and modality 1 the progressive and the imperfective is universally compatible with any devices to read

The Grammaticalization of Tense, Aspect, Modality and Evidentiality (Trends in Linguistics. Studies and Monographs TilsM) 1st Edition by Kees Hengeveld (Author, Editor), Heiko Narrog (Author, Editor), Hella Olbertz (Author, Editor) & Book 27 of 37: Trends in Linguistics. Studies and Monographs [TiLSM]

The Grammaticalization of Tense, Aspect, Modality and ...
In Lesson 1, we first compare verb aspect with verb tense and verb modality.Then in Lesson 2, we explore the four English aspects (simple, progressive, perfect and perfect progressive) before applying their 12 combinations in Lesson 3 to general and academic settings.

Is verb aspect different to tense and modality? | Academic ...
1.1 Semantic Concepts Under lying Tense, Aspect, and Modality We adopt the following definitions for the semantic concepts underlying the notions of tense, aspect, and modality, respectively.

Mood, Aspect, Modality Revisited: New Answers to Old ...
In linguistics and philosophy, modality is the phenomenon whereby language is used to discuss possible situations. For instance, a modal expression may convey that something is likely, desirable, or permissible. Quintessential modal expressions include modal auxiliaries such as English "should", modal adverbs such as "probably", and modal adjectives such as "conceivable".

Aspect and Modality 1 The Progressive And The Imperfective

Joan Bybee and her colleagues present a new theory of the evolution of grammar that links structure and meaning in a way that directly challenges most contemporary versions of generative grammar. This study focuses on the use and meaning of grammatical markers of tense, aspect, and modality and identifies a universal set of grammatical categories. The authors demonstrate that the semantic content of these categories evolves gradually and that this process of evolution is strikingly similar across unrelated languages. Through a survey of seventy-six languages in twenty-five different phyla, the authors show that the same paths of change occur universally and that movement along these paths is in one direction only. This analysis reveals that lexical substance evolves into grammatical substance through various mechanisms of change, such as metaphorical extension and the conventionalization of implicature. Grammaticization is always accompanied by an increase in frequency of the grammatical marker, providing clear evidence that language use is a major factor in the evolution of synchronic language states. The Evolution of Grammar has important implications for the development of language and for the study of cognitive processes in general.

Preface -- 1. The semantics of tense, aspect and modality in the languages of the world / Lotte Hogeweg, Helen de Hoop & Andrej Malchukov -- 2. Incompatible categories: Resolving the 'present perfective paradox' / Andrej L. Malchukov -- 3. The perfective/imperfective distinction: Coercion or aspectual operators? / Corien Bary -- 4. Lexical and compositional factors in the aspectual system of Adyghe / Peter M. Arkadiev -- 5. Event structure of non-culminating accomplishments / Sergei Tatevosov & Mikhail Ivanov -- 6. The grammaticalised use of the Burmese verbs la 'come' and .wà 'go' / Nicoletta Romeo -- 7. Irrealis in Yurakaré and other languages: On the cross-linguistic consistency of an elusive category / Rik van Gijn & Sonja Gipper -- 8. On the selection of mood in complement clauses / Rui Marques -- 9. 'Out of control' marking as circumstantial modality in Stát'imcets / Henry Davis, Lisa Matthewson & Hotze Rullmann -- 10. Modal geometry: Remarks on the structure of a modal map / Kees de Schepper & Joost Zwarts -- 11. Acquisitive modals / Johan van der Auwera, Petar Kehayov & Alice Vittrant -- 12. Conflicting constraints on the interpretation of modal auxiliaries / Ad Foolen & Helen de Hoop -- 13. Modality and context dependence / Fabrice Nauze -- 14. Verbal semantic shifts under negation, intensionality, and imperfectivity: Russian genitive objects / Barbara H. Partee & Vladimir Borschev -- 15. The Estonian partitive evidential: Some notes on the semantic parallels between aspect and evidential categories / Anne Tamm -- Index.

This book presents new perspectives on the study of Aspect and Modality in Chinese Historical Linguistics. Based on the international Workshop on Aspect and Modality in Chinese, the book includes the latest research findings in the field to make them available not only to specialists in Classical and Buddhist Chinese, but also to researchers and students of general linguistics and of the universals of language. It also discusses different aspects of the AM (Aspect-Modality) and the TAM (Tense-Aspect-Modality) system of Chinese. It provides a comprehensive overview of both of the universally related systems of aspect and modality. The first part of the book focuses on aspectual features of Chinese; these include basic studies on the syntactic representation of the aspectual structure of the verb phrase in Archaic Chinese, the aspectual function of different object constructions and their development, temporal features of the verb phrase, and the aspectual functions of no minimalization processes. The second part includes articles highlighting different aspects of the modal system or the interplay between tense, aspect and modality in Chinese, including a survey on the history of studies on modality in Chinese and the modal and temporal aspectual/markers indicating future meanings, a specialized study on modal deontic verbs in the Buddhist Vinaya texts, the modal function of rhetorical questions in Buddhist Chinese, and a study on the diachronic development of the aspectual and modal system in Chinese.

Over the past several decades, linguistic theorizing of tense, aspect, and mood (TAM), along with a strongly growing body of crosslinguistic studies, has revealed complexity in the data that challenges traditional distinctions and treatments of these categories. Mood, Aspect, Modality Revisited argues that it's time to revisit our conventional assumptions and reconsider our foundational questions: What exactly is a linguistic category? What kinds of categories do labels such as [subjunctive,] [imperative,] [future,] and [modality] truly refer to? In short, how categorical are categories? Current literature assumes a straightforward link between grammatical category and semantic function, and descriptions of well-studied languages have cultivated a sense of predictability in patterns over time. As the editors and contributors of Mood, Aspect, Modality Revisited prove, however, this predictability and stability vanish in the study of lesser-known patterns and languages. The ten provocative essays gathered here present fascinating cutting-edge research demonstrating that the traditional grammatical distinctions are ultimately fluid¶and perhaps even illusory. Developing groundbreaking and highly original theories, the contributors in this volume seek to unravel more general, fundamental principles of TAM that can help us better understand the nature of linguistic representations.

This book brings together a series of contributions to the study of grammaticalization of tense, aspect, and modality from a functional perspective. All contributions share the aim to uncover the functional motivations behind the processes of grammaticalization under discussion, but they do so from different points of view.

¶The semantics of aspect and modality¶ will be of interest both to linguists working on temporality, as a general phenomenon in language, and Hebraists investigating the semantics of the verbal forms in biblical Hebrew. Tense, aspect and modality are among the most challenging discussed areas of language. Similarly, the semantics of the verbal system in biblical Hebrew has been investigated since the Middle Ages. Galia Hatav provides extensive critical overviews of research in both areas, and suggests a new approach for analyzing the biblical Hebrew verb system, showing it to be tenseless. The overall approach adopted in the book is basically of truth conditional semantics, and adheres closely to Kamp's DRT (Discourse Representation Theory). For each phenomenon covered, the relevant literature is surveyed and critically discussed, with reference to English, and when relevant to other languages, too. The conclusions arrived at are then applied to biblical Hebrew. However, despite the sophisticated semantic theory the book is also meticulous in its attention to philological details of the Hebrew text, lending to a particularly harmonious combination of formal and discourse approach. The biblical Hebrew part of the book will be of interest mainly to Hebraists, but linguists dealing with temporality in general may find it useful as an interesting illustration for a tenseless exotic language.

In this collective volume, some of the leading experts in the field explore aspects of linguistic variation and change in one of the core areas of Ancient Greek grammar: tense, aspect, and modality.

This volume addresses problems of semantics regarding the analysis of tense and aspect (TA) markers in a variety of languages, including Arabic, Croatian, English, French, German, Russian, Thai, and Turkish. Its main interest goes out to epistemic uses of such markers, whereby epistemic modality is understood as indicating [a degree of compatibility between the modal world and the factual world] (Deckerlck). All contributions, moreover, tackle these problems from a more or less cognitive point of view, with some of them insisting on the need to provide a unifying explanation for all usage types, temporal and non-temporal, and all of them accepting the premise that the semantics of TA categories essentially refers to subjective, rather than objective, concerns. The volume also represents one of the first attempts to gather accounts of TA marking (in various languages) that are explicitly set within the framework of Cognitive Grammar. Ultimately, this volume aims to contribute to establishing an awareness that modal meaning elements are directly relevant to the analysis of the grammar of time.

This book explores the thesis that in the Kwa languages of West Africa, aspect and modality are more central to the grammar of the verb than tense. Where tense marking has emerged it is invariably in the expression of the future, and therefore concerned with the impending actualization or potentiality of an event, hence with modality, rather than the purely temporal sequencing associated with tense. The primary grammatical contrasts are perfective versus imperfective. The main languages discussed are Akan, Dangme, Ewe, Ga and Tuvuli while Nzema-Ahanta, Likpe and Eastern Gbe are also mentioned. Knowledge about these languages has deepened considerably during the past decade or so and ideas about their structure have changed. The volume therefore presents novel analyses of grammatical forms like the so-called S-Aux-O-V-Other or [future] constructions, and provides empirical data for theorizing about aspect and modality. It should be of considerable interest to Africanist linguists, typologists, and creolists interested in substrate issues.
