Research is integrated into the whole fabric of modern-day society and culture. It affects our lives in so many ways from finding a job to knowing how to manage our health. Information studies designed to understand this array of information encompasses a wide expanse of disciplines. Many of these areas draw their philosophical and research bases from a mixture of disciplines within the social sciences and the humanities. This book takes a holistic view of these diverse areas and shows how they are united through the common thread of enhancing our knowledge of and understanding

successful teaching experience in this course, Robert Pagano's introductory text takes an intuitive, concepts-based approach to descriptive and inferential statistics. He uses the sign test to introduce inferential statistics, empirically derived sampling distributions, many visual aids, and lots of interesting examples to promote student understanding. One of the hallmarks of this text is the positive feedback from students -- even students who are not mathematically inclined praise the text for its clarity, detailed presentation, and use of humor to help make concepts accessible and memorable. Thorough explanations precede the introduction of every formula, and
