You are being watched. Your every movement is being tracked, your every word recorded. Your spouse may be an informer, your children may be listening at your door, your best friend may be a member of the secret police. You are alone among thousands, among great crowds of the brainwashed, the well-behaved, the loyal. Productivity has never been higher, the media blares, and the army is ever triumphant. One wrong move, one slip-up, and you may find yourself disappeared -- swallowed up by a monstrous bureaucracy, vanished into a shadowy labyrinth of interrogation chambers, show trials, and secret prisons from which no one ever escapes. Welcome to the world of the dystopia, a world of government and society gone horribly, nightmarishly wrong. What happens when civilization invades and dictates every aspect of your life? From 1984 to *The Handmaid's Tale*, from *Children of Men* to *Bioshock*, the dystopian imagination has been a vital and gripping cautionary force. *Brave New Worlds* collects the best tales of totalitarian menace by some of today's most visionary writers, including Neil Gaiman, Paolo Bacigalupi, Orson Scott Card, Kim Stanley Robinson, and Ursula K. Le Guin. When the government wields its power

Immerse yourself into the fractured vision of the post-pandemic world from Tom Clancy's The Division® 2 through this new story. Months after the outbreak of a devastating global pandemic that started in New York City on Black Friday, traces of rebirth are spreading across the United States. Spring has come to the nation, and with it a glimmer of hope as civilians band together in settlements, trying to carve out a better life. Amidst a ruined government, a shattered infrastructure, and an eroding civilization, The Division - an autonomous unit of sleeper agents activated when all else fails - is all that protects the people from predators who would harm them, scavengers who would take from them, and oppressors who would exploit them. Aurelio Diaz is one of those agents. A man of great honor, he is on the hunt for one of his colleagues who inexplicably abandoned his duty and caused the death of multiple civilians. This trail leads him to April Kelleher, a resourceful civilian who traveled out of New York into a troubled American Midwest. There, she hopes to understand why her husband was murdered and if an antiviral to the deadly disease exists. Together, Agent Diaz and April soon uncover an imminent threat to the future of the country. They must act to preserve civilization's last hope to stop a new virus and save itself from a final collapse.

A tale of heroism and exploit in the tradition of Robert E. Howard... Enter Remy, a quick-witted courier whose dangerous freight leads him into the vanguard of an ancient war between forces of light and the rising tide of shadows that threatens to overwhelm the burgeoning civilizations of the Two Rivers Gulf. The story opens with Remy alone and near death after an encounter with several stormclaw scorpions. His horse dead and poison sapping his strength, Remy collapses with his package at his side, undelivered. When he awakes, he is in the company of a band of adventurers who found him by the side of the road and nursed him back to health. Among them is a grim dragonborn paladin named Biri-Daar, whose wariness of the magical seals on Remy's freight is outweighed by an overwhelming sense of duty to those in need. As they journey on, the nature of Remy's package becomes a greater and greater curiosity. Soon the party, which has come to comprise some six-strong adventurers, finds itself to be the lynchpin that holds an army of netherworld forces at bay. Award-winning author and veteran shared-world writer Alex Irvine brings his unique characters and considerable storytelling talents to bear in the world of Dungeons & Dragons®.
