Presents the life of the soldier who committed a massive national security breach by releasing thousands of classified documents to WikiLeaks, exploring the influence of his political views and gender identity issues on his actions.

Callie of Wideopens is the beautiful 18-year-old ward of Jane and Ethan. Jane is dying and her lonely husband is tormented by impure thoughts about the girl. The crone who supplies Jane's herbs has a vision of a terrible act. In a misguided attempt to alter the fate of her husband, Jane makes a desperate request of Callie. In doing so, she unwittingly sets in motion the crone ' s prophecy.

In this book, James Longenbach develops a fresh approach to major American poetry after modernism. Rethinking the influential "breakthrough" narrative, the oft-told story of post-modern poets throwing off their modernist shackles in the 1950s, Longenbach offers a more nuanced perspective. Reading a diverse range of poets - John Ashbery, Elizabeth Bishop, Amy Clampitt, Jorie Graham, Richard Howard, Randall Jarrell, Robert Lowell, Robert Pinsky, and Richard Wilbur - Longenbach reveals that American poets since mid-century have not so much disowned their modernist past as extended elements of modernism that other readers have suppressed or neglected to see. In the process, Longenbach allows readers to experience the wide variety of poetries written in our time - without asking us to choose between them.

This volume provides a comprehensive introduction to foundational topics in sound design for linear media, such as listening and recording; audio postproduction; key musical concepts and forms such as harmony, conceptual sound design, electronica, soundscape, and electroacoustic composition; the audio commons; and sound ' s ontology and phenomenology. The reader will gain a broad understanding of the key concepts and practices that define sound design for its use with moving images as well as important forms of composed sound. The chapters are written by international authors from diverse backgrounds who provide multidisciplinary perspectives on sound in its linear forms. The volume is designed as a textbook for students and teachers, as a handbook for researchers in sound, media and experience, and as a survey of key trends and ideas for practitioners interested in exploring the boundaries of their profession.

This book constitutes the refereed proceedings of the 8th International Conference on Web Reasoning and Rule Systems, RR 2014, held in Athens, Greece in September 2014. The 9 full papers, 9 technical communications and 5 poster presentations presented together with 3 invited talks, 3 doctoral consortial papers were carefully reviewed and selected from 33 submissions. The conference covers a wide range of the following: semantic Web, rule and ontology languages, and related logics, reasoning, querying, searching and optimization, incompleteness, inconsistency and uncertainty, non-monotonic, common sense, and closed-world reasoning for the web, dynamic information, stream reasoning and complex event processing, decision making, planning, and intelligent agents, machine learning, knowledge extraction and information retrieval, data management, data integration and reasoning on the web of data, ontology-based data access, system descriptions, applications and experiences.
