Filled with lessons, tests, puzzles, and visual riddles that kick-start the flow of ideas, this invaluable guide identifies four major destructive work patterns and offers insightful ways to overcome them. While everyone may not have reached their creativity potential, Levesque debunks the myth that creativity belongs to only a few

In The Charisma Myth, Olivia Fox Cabane offered a groundbreaking approach to becoming more charismatic. Now she teams up with Judah Pollack to reveal how anyone can train their brain to have more eureka insights. The creative mode in your brain is like a butterfly. It's beautiful and erratic, hard to catch and highly valued as a result. If you want to capture it, you need a net. Enter the executive mode, the task-oriented network in your brain that help you tie your shoes, run a meeting, or pitch a client. To succeed, you need both modes to work together--your inner butterfly to be active and free, but your inner net to be ready to spring at the right time and create that "aha!" moment. But is there any way to trigger these insights, beyond dumb luck? Thanks to recent neuroscience discoveries, we can now explain these breakthrough moments--and also induce them through a series of specific practices. It turns out there's a hidden pattern to all these seemingly random breakthrough ideas. From Archimedes' iconic moment in the bathtub to designer Adam Cheyer's idea for Siri, accidental breakthroughs throughout history share a common origin story. In this book, you will learn to master the skills that will transform your brain into a consistent generator of insights. Drawing on their extensive coaching and training practice with top Silicon Valley firms, Cabane and Pollack provide a step-by-step process for accessing the part of the brain that produces breakthroughs and systematically removing internal blocks. Their tactics range from simple to zany, such as: · Imagine an alternate universe where gravity doesn't exist, and the social and legal rules that govern it. · Map Disney's Pocahontas story onto James Cameron's Avatar. · Rid yourself of map Disney's Pocahontas story onto James Cameron's Avatar. · Rid yourself of map Disney's Pocahontas story onto James Cameron's Avatar. · Literally change your perspective by climbing a tree. · Stimulate your butterfly mode by watching a foreign film without subtitles. By trying the exercises in this book, readers will emerge with a powerful new capacity for breakthrough thinking.

"This counterintuitive and powerfully effective approach to creativity demonstrates how every corporation and organization can develop an innovative culture. The traditional attitude toward creativity in the American business world is to 'think outside the box'-- to brainstorm without restraint in hopes of coming up with a breakthrough idea, often in moments of crisis. Sometimes it works, but it's a problem-specific solution that does nothing to engender creative thinking more generally. 'Inside the Box' demonstrates Systematic Inventive Thinking (SIT), which systemizes creativity as part of the corporate culture."--Provided by publisher.

In this American/Japanese collaboration of two of today's finest minds, Nadler and Hibino, acclaimed professors and consultants, introduce a new approach to problems, based on their research into the intuitive behavior of the most successful problem solvers and innovators.
