and Money: A haunting true story of three people locked in a fierce struggle against time and the sea—and each other. In July 1973, Bob Tininenko; his wife, Linda; and his brother-in-law, Jim Fisher, set sail from Tacoma, Washington, on a thirty-one-foot trimaran down the West Coast to Costa Rica. The journey was expected to take a matter of weeks, but ten days into the cruise, the party encountered a freak storm off the coast of northern California. When gale-force winds and fifty-foot waves capsized their boat, the voyage became a nightmare. For seventy-two days, the trio was lost at sea. Challenged by nature and compromised by a bitter rivalry, their courage and will to live was put to the ultimate test. Jim, the owner and skipper of the boat, was a devout fundamentalist whose recognition of

God's will in every event brought him into increasing conflict with his brother-in-law. As the two men battled to take control of a dire situation, Linda kept a secret that would lead to heartrending tragedy. A "hair-raising" (Houston Chronicle) account of shipwreck and survival and a searing portrait of faith without reason, *Lost!* is an unforgettable true story from "a writer of tremendous power and achievement" (Detroit Free Press).

*How Cool Are Penguins* is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

Talk. Sketch. Prototype. Repeat. You know right away when you see an effective chart or graphic. It hits you with an immediate sense of its meaning and impact. But what actually makes it clearer, sharper, and more effective? If you're ready to create your own "good charts"--data visualizations that powerfully communicate your ideas and research and that advance your career--the Good Charts Workbook is the hands-on guide you've been looking for. The

original Good Charts changed the landscape by helping readers understand how to think visually and by laying out a process for creating powerful data visualizations. Now, the Good Charts Workbook provides tools, exercises, and practical insights to help people in all kinds of enterprises gain the skills they need to get started. Harvard Business Review Senior Editor and dataviz expert Scott Berinato leads you, step-by-step, through the key challenges in creating good charts--controlling color, crafting for clarity, choosing chart types, practicing persuasion, capturing concepts--with warm-up exercises and mini-challenges for each. The Workbook includes helpful prompts and reminders throughout, as well as white space for users to practice the Good Charts talk-sketch-prototype

An intranet portal project may well be the first and last project in your organisation that truly touches everyone, from the office of your CEO to the newest recruit. It may well be the most significant investment that you ever make in your people, their processes and their systems and has the power and potential to transform your organisation. However, it can be a tough project to deliver, bringing great exposure to its participants. All your customers will be only a small march away down the corridor and will all know where you live! Considering the \$1.5 billion market for intranet

portal technology worldwide, there are surprisingly few books on the topic (and those typically either very technical or very theoretical). The Intranet Portal Guide is a deliberately practical handbook for the stressed middle manager, seeking to make things happen in their organisation. The book is divided into three sections (before, during and after) and 31 chapters, addressing everything from the key issue of how to make the business case through to ongoing performance enhancement and benefit realisation. It is packed full of tools, templates, plans and processes for successful delivery - based on real life experience of implementation at two major UK companies.

more than anything else. It's not mechanical, and therefore, it's unfamiliar territory. Electrons are invisible, and to an untrained enthusiast they can do unpredictable things. Finally, here is an enthusiast's guide that takes the mysteries and misunderstandings out of automotive electrical design, modification, diagnostics, and repair. Automotive Wiring and Electrical Systems is the perfect book to unshroud the mysteries of automotive electrics and electronic systems. The basics of electrical principles, including voltage, amperage, resistance, and Ohm's law, are revealed in clear and concise detail so the enthusiast understands what these mean in the construction and repair of automotive electrical circuits. All the tools and the proper equipment required for automotive

electrical tasks are covered. In addition, this in-depth guide explains how to perform more complex tasks, such as adding new circuits, installing aftermarket electronics, repairing existing circuits, and troubleshooting. It also explains how to complete popular wiring projects, such as adding late-model electronic accessories and convenience items to earlier-model cars, installing relay systems, designing and assembling multi-function circuits and harnesses, and much more. With this book in hand, you will be able to assemble, design, and build single- and multi-function circuits and harnesses, troubleshoot and repair existing circuits, and install aftermarket systems and electronics. The First World War's centenary generated a mass of commemorative activity worldwide. Officially and unofficially; individually, collectively and commercially; locally, nationally and internationally, efforts were made to respond to the legacies of this vast conflict. This book explores some of these responses from areas previously tied to the British Empire, including Australia, Britain, Canada, India and New Zealand. Showcasing insights from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary. How far did commemoration become

celebration, and how merited were such responses? To what extent did the centenary serve wider social and political functions? Was it a time for new knowledge and understanding of the events of a century ago, for recovery of lost or marginalised voices, or for confirming existing clichés? And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities? The contributors to this book grapple with these questions, coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the 'war to end all wars'.
