For voice and piano, with chord symbols and guitar chord diagrams.

This heavily illustrated manual provides a timely, in-depth review of the art of sniping in war and antiterrorist environments. Drawing on a vast, firsthand knowledge of sniper skills, former British Army sniper and sniper instructor Mark Spicer describes the role of the sniper in peace and in war, in reconnaissance and counter-surveillance, in cities, in vehicles, at night and by day. He presents crucial information about training and equipment, judgment and positioning, details of great relevance to professional marksmen, both military and law enforcement. This comprehensive manual will also be of interest to hunters, weapons enthusiasts, competition shooters, and paintball participants. The book is complimented by 280 full color illustrations, diagrams, and related information.

The perfect introduction to the electronic keyboard, and ideal for the absolute beginner getting started with their first instrument. With absolutely no musical knowledge required, this simple yet comprehensive guide is perfect for adults and children alike.

Yes, you can turn those great melodies and smokin' grooves in your head into stunning digital music! And you don't have to be a musical genius or a computer geek to do it! Composing Digital Music For Dummies shows you everything you need to know to compose great tunes using the hottest digital tools. This friendly, plain-English guide explains all of the digital music basics, including how to work with the latest hardware and software, use templates from the companion CD-ROM to make a quick start, build your first tune, and save it in different formats. You'll also find out how to add instruments to your score, set tempos and keys, create chord symbols and show fretboards, add lyrics to your tune, and much more. Discover how to: Write and arrange digital music Determine what — if any — equipment you need Create your own ringtones and mp3s Compose with a MIDI controller, or a mouse Work with notation software Use keyboard shortcuts Publish your creations on the Internet Build your own tune from scratch Extract parts from your score for each instrument The companion CD-Rom also includes a demo of Sebelius 5, the most popular music notation software, as well as audio files for all music examples in the book. With this step-by-step guide and your computer, you'll have everything you need to start writing, arranging, and publishing your own digital music — immediately! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Katherine Taggart—nicknamed "Rusty" for her curly red hair—shines like a ray of sunshine at her aunt and uncle's orphanage. Unaccustomed to traveling alone in the pioneer West, Rusty is accompanied on her first orphanage placement trip by the kind but reserved widower Chase McCandles. When Chase offers Rusty a position in his stately home as a companion for his young son, Quintin, Rusty accepts. But when she realized how little time Chase spends with Quintin, Rusty's heart is torn. How can she convince Chase that his son desperately needs a father? And can Chase learn to trust God to help him demonstrate his love and affection for Quintin—and for Rusty? A heartwarming story of love, trust, and family.

Learn how to read music, play with both hands at the same time, play chords and scales, as well as many more exciting piano techniques!.

This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.

This compelling novel follows four women as they learn to balance children, estranged husbands, boyfriends, and problems at work through their faith in God. Michelle, Tonya, Mrs. Judson, and Miz Ida. African-American, white, rich, poor -- they seemingly have nothing in common. Yet every day they face the complex realities of twenty-first-century urban life as they try to balance their needs with their belief in God. Through the course of a year, these women must come to terms with the past, discover their true identities, and recognize the unexpected miracles that reveal God's all-encompassing love. These four women entertain us and invite us to join in their lives. As they welcome us, they also introduce us to the men in their lives. The men play supporting roles, adding color and zest to the lives of the Cover Girls. Bishop Jakes knows the struggles real women encounter and the losses that make it difficult to face the future. He brings compassionate insight and deep wisdom to this novel and proves that he is not only a gifted preacher, but a born storyteller.
