Trivium Test Prep's **Certified Energy Manager Exam Practice Questions: CEM Test Prep and Review** offers a FULL practice exam to help prepare you for the Certified Energy Manager Exam. Score boosting CEM practice exam questions including highly detailed explanations and answers. Working through Certified Energy Manager practice test questions is the most important and one of the most effective methods possible for preparing for the CEM exam. If you don't know what is it on the exam, how can you be ready for test day? We understand that not everyone needs or wants a comprehensive study guide, so if you feel you know the material and just want to hone your skills and get some practice, you will find no better CEM exam practice test questions than these. About Trivium Test Prep Trivium Test Prep's study materials are created by industry and educational experts. Other study guides simply tell you what is on the test, not how that material is applied or, more importantly, HOW TO STUDY FOR IT. Trivium study guides are different. Our dedicated professionals know how people think and learn, and have created the Certified Energy Manager Exam Practice Questions: CEM Test Prep and Reviewbased on what research has shown to be the fastest, easiest, and most effective way to prepare for the exam. Unlike other study guides that are stamped out in a generic fashion, our Certified Energy Manager Exam Practice Questions: CEM Test Prep and Review practice test book is specifically tailored for your exact needs.

Topics include distributed generation, energy auditing, rate structures, economic evaluation techniques, lighting efficiency improvement, HVAC optimization, combustion and use of industrial wastes, steam generation and distribution system performance, control systems and computers, energy systems maintenance, renewable energy, and industrial water management.~BOOK JACKET.

This fully updated, comprehensive reference will guide you step-by-step in applying the principles of energy engineering and management to the design of electrical, HVAC, utility, process and building systems for both new and retrofit projects. You will learn how to do an energy analysis of any system. Detailed presentations cover electrical system optimization, state-of-the-art lighting and lighting controls, thermal storage, cogeneration, HVAC system optimization, HVAC and building controls, and computer technologies. The fifth edition includes a new chapter covering codes, standards and legislation, as well as a new chapter on compressed air systems. You'll also find coverage on use of innovative third party financing mechanisms such as performance contracting to implement energy cost reduction measures. The text is thoroughly illustrated with tables, graphs, diagrams, and sample problems with worked-out solutions.
