This book provides a thorough description of an aerodynamic design and analysis systems for Axial-Flow Compressors. It describes the basic fluid dynamic and thermodynamic principles, empirical models and numerical methods used for the full range of procedures and analytical tools that an engineer needs for virtually any tpe of Axial-Flow Compressor, aerodynamic design or analysis activity. It reviews and evaluates several design strategies that have been recommended in the literature or which have been found to be effective. It gives a complete description of an actual working system, such that readers can implement all or part of the system. Engineers responsible for developing, maintaining of improving design and analysis systems can benefit greatly from this type of reference. The technology has become so complex and the role of computers so pervasive that about the only way this can be done today is to concentrate on a specific design and analysis system. The author provides practical methodology as well as the details needed to implement the suggested procedures.

Biometrics has moved from using fingerprints to using many methods of assessing human physical and behavioral traits. This guide introduces a new performance evaluation framework designed to offer full coverage of performance evaluation of biometric systems.

Synopsis: Web sites are an essential tool that every business must have in today's economy. Only 15 years ago, you could count the number of Web sites in the world with five or six digits; today there are between 15 and 30 billion active Web sites and millions more being added every day. Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. The cost of creating a Web site has risen right alongside the number of Web sites created though and many people are nervous about being able to utilize this revolutionary medium without breaking the bank. This book has been created for just such people, outlining for you in perfect detail everything you need to know to create a traffic attracting Web site, while spending little or no money at all. There are countless resources available, and when you put them all together, they provide a complete toolkit that can make anyone a top notch Web site in no time flat. You will learn how to buy a domain name and host your Web site for less than \$15, with no additional fees charged to your account. You will learn how to use open source software like Wordpress, Joomla, and Mambo to create a platform on which you can build anything you want. You will learn how blogging has made Web site creation easier than ever and how sites like Squidoo, Facebook, and MySpace allow you more freedom to build traffic and draw more attention to what you are advertising at any given time. You will learn how to use common software to edit and tweak your Web sites and how to read the basic code that all Web sites are created in. In addition, an entire chapter is devoted to teaching you how to promote your Web site and draw traffic to it, without spending a dime in the process. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site. With the added resource of hours of interviews with web professionals you will learn which free resources not to use and which ones to outright avoid, as well as how to find and install open source modules and tools to enhance the look and feel of your site. You will learn where you can find copyright-free images to use on your Web sites and how to get free copy that will draw traffic and entertain your visitors. You will learn how to keep a free Web site from falling into the traps the major search engines set to stop spam and ultimately how to leverage new friends, business contacts, and interactions out of your Web site. If you are now, or have ever, considered starting your own Web site before, this book will map the way for you.

A fascinating and complex piece of machinery, the modern motorcycle is easily as complex as the modern car. Clear, jargon-free text, and detailed cutaway illustrations show exactly how the modern bike works. From the basics of the internal combustion engine, to the wide variety of modern transmissions and ancillary systems.

A comprehensive survey of the epidemiology of common environmental exposures, this volume covers diet, water, particulates in outdoor air, nitrogen dioxide, ozone, environmental tobacco smoke, radon in homes, electromagnetic fields, and lead. Design and analysis issues, risk assessment and meta-analysis, and future directions in environmental epidemiology are also discussed. All chapters provide a review of the relevant literature as well as an overview of important methodologic issues, particularly exposure assessment and statistical methods. Most of these exposures are widespread and low-level, and are thought to increase the risk of chronic diseases that have many causes. Even though the disease risks due to these exposures may be low, the public health burden may be significant because large numbers of people are exposed. Such exposures are inherently difficult to detect via observational epidemiology. This book clarifies the problems and suggests ways to move forward. It will be useful to students and practitioners of public health, environmental health, and epidemiology.

Between two brothers... Xander Santiago spent years living it up as a billionaire playboy. Never given a chance to lead his family business in the boardroom, he became a master in the bedroom instead. His older brother, Javier, inherited the company and worked tirelessly to make it an empire. But while cutthroat corporate espionage took its toll on Javier, nothing was as devastating as the seemingly senseless murder of his wife. It propelled him into a year of punishing rage and guilt...until Xander came to his rescue. Comes an irresistible woman... Eager to rejuvenate Javier's life, Xander shanghai's him to Louisiana, where they meet beautiful London McLane. After a decade of tragedy and struggle, London is determined to make a fresh start—and these sexy billionaire brothers are more than willing to help. In every way, London is stunned to find herself open to every heated suggestion...and desperately hoping that her love will heal them. And inescapable danger. But a killer is watching, on a single-minded mission to destroy everything the Santiago brothers hold dear, especially London. As fear and desire collide, every passionate beat of her heart could be her last.

Writers flock to National Novel Writing Month (NaNoWriMo) each November because it provides a procrastination-busting deadline. But only a fraction of the participants meet their goal. Denise Jaden was part of that fraction, writing first drafts of her two published young adult novels during NaNoWriMo. In Fast Fiction, she shows other writers how to do what she did, step-by-step, writer to writer. Her process starts with a prep period for thinking through plot, theme, characters, and setting. Then Jaden provides day-by-day coaching for the thirtyday drafting period. Finally, her revision tips help writers turn merely workable drafts into compelling and publishable novels. A portion of publisher proceeds will be donated to National Novel Writing Month (NaNoWriMo)

Examines the yearly movement of slave prices and changes in the demographics of the Cuban slave market from 1790 to 1880.

When high school sophomore Jessie's long-term best friend transforms herself into a punk and goes after Jessie's would-be boyfriend, Jessie decides to visit "the wild nerd yonder" and seek true friends among classmates who play Dungeons and Dragons.

From New York Times bestselling author Madeline Hunter comes the first novel in a Wicked regency romance trilogy about three irresistibly attractive brothers... Gareth Fitzallen is celebrated for four things: his handsome face, his notable charm, his aristocratic connections, and an ability to give the kind of pleasure that has women begging for more. Normally he bestows his talents on experienced, worldly women. But when he heads to Langdon's End to restore a property he inherited—and to investigate a massive art theft—he lays plans to seduce a most unlikely lady. Eva Russell lives a spinster's life of precarious finances and limited dreams while clinging to her family's old gentry status. She supports herself by copying paintings while she plots to marry her lovely sister to a well-established man. Everyone warns her of Gareth's reputation, and advises her to lock her sister away. Only it is not her sister Gareth desires. One look, and she knows he is trouble. One kiss, however, proves she is no match for this master of seduction.
