Coronavirus News, Markets and AI explores the analysis of unstructured data from coronavirus-related news and the underlying sentiment during its real-time impact on the

Acces PDF Cloud Computing Pankaj Sharma

world and on global financial markets, in particular. In an age where information - both real and fake - travels in the blink of an eye and significantly alters market sentiment daily, this book is a blow by blow account of economic impact of the COVID-19 pandemic. The volume: Details how AI driven machines capture, analyse and score relevant on-ground news sentiment to analyse the dynamics of market sentiment, how markets react to good or bad news across 'short term' and 'long term'; Investigates what have been the most prevalent news sentiment during the pandemic, and its linkages to crude oil

ways we do not understand yet. This book traces the evolution of AI in contemporary history. It analyses how AI is primarily being driven by "capital" as the only "factor of production" and its consequences for the global political economy. It further explores the dystopian prospect of mass unemployment by AI and takes up the ethical aspects of AI and its possible use in undermining natural and fundamental rights. A tract for the times, this volume will be a major intervention in an area that is heavily debated but rarely understood. It will be essential reading for researchers and

students of digital humanities, politics, economics, science and technology studies, physics, and computer science. It will also be key reading for policy makers, cyber experts and bureaucrats.

Big Data is everywhere. It shapes our lives in more ways than we know and understand. This comprehensive introduction unravels the complex terabytes that will continue to shape our lives in ways imagined and unimagined. Drawing on case studies like Amazon, Facebook, the FIFA World Cup and the Aadhaar scheme, this book looks at how Big Data is

changing the way we behave, consume and respond to situations in the digital age. It looks at how Big Data has the potential to transform disaster management and healthcare, as well as prove to be authoritarian and exploitative in the wrong hands. The latest offering from the authors of *Artificial Intelligence: Evolution, Ethics and Public Policy*, this accessibly written volume is essential for the researcher in science and technology studies, media and culture studies, public policy and digital humanities, as well as being a beacon for the general reader to make sense of the digital

On 8 November 2016, at 8:00 PM IST, Prime Minister Narendra Modi announced that four hours from his declaration, all 500 and 1000 rupees notes would be devalued. At the stroke of the midnight hour, India awoke to an unexpected tryst with demonetization. An incisive and insightful take on the issue, Pankaj Sharma and Saurav Sanyal's book gives agency to the ordinary Indian voters, the 'torchbearers of democracy'. Going beyond the idea of the citizen as a mere recipient of the government's edicts or munificence, the

Acces PDF Cloud Computing Pankaj Sharma

authors focus on the power of the common man as a voter and the repercussions of demonetization on the upcoming 2019 general elections in India. In 2019, will demonetization be seen as the waterloo of Modi, or will he emerge stronger and even more powerful? In dissecting the political implications of demonetization, the authors espouse a varied yet nuanced approach. From discussing the role of human psychology in making political choices to a search for an on-the-ground sentiment in determining the factors of influence, Sharma and Sanyal leave no stone unturned in analysing demonetization

as THE political issue for the future of Indian democracy.
