Countdown to a Moon Launch: Preparing Apollo for Its ...

The chapter on the Lunar Module starts at 170 days before launch. Other chapters cover the vehicle assembly building, the launch pad, and the launch countdown itself (and how it works, when things have to happen, and how the launch teams coped when they didn't).

Countdown to a Moon Launch | Guide books

Synopsis. Expand/Collapse Synopsis. Thousands of workers labored at Kennedy Space Center around the clock, seven days a week, for half a year to prepare a mission for the liftoff of Apollo 11. This is the story of what went on during those hectic six months. Countdown to a Moon Launch provides an in-depth look at the carefully choreographed workflow for an Apollo mission at KSC.

Countdown to a Moon Launch eBook by Jonathan H. Ward ...

"Countdown to a Moon Launch" explains how everything was brought together in the months and days leading up to an Apollo launch. Like its companion, it contains a healthy dose of obscure photographs, diagrams, and first-hand accounts, which I'd never seen or read before.

Countdown to a moon launch by Jonathan H. Ward, 2015 edition, in English

Countdown to a moon launch (2015 edition) | Open Library

Silversea has marked the one-year countdown to the first voyage of its new ship Silver Moon 8 August 2019 Silversea's 596-passenger ship, which will be a sister vessel to Silver Muse, is due to embark on its inaugural trip on 6 August 2020 when it will sail from Trieste to Civitavecchia in Italy on an 11-day itinerary.

One-Year Countdown to Silver Moon Launch | Northern ...

Liftoff is scheduled for Nov. 15 at 7:27 p.m. EST (0027 Nov. 16 GMT). SpaceX's Crew-1 astronaut mission for NASA is now scheduled to launch to the International Space Station today, Nov. 15, at 7 ...

Thousands of workers labored at Kennedy Space Center around the clock, seven days a week, for half a year to prepare a mission for the liftoff of Apollo 11. This is the story of what went on during those hectic six months. Countdown to a Moon Launch provides an in-depth look at the carefully choreographed workflow for an Apollo mission at KSC. Using the Apollo 11 mission as an example, readers will learn what went on day by day to transform partially completed stages and crates of parts into a ready-to-fly Saturn V. Firsthand accounts of launch pad accidents, near misses, suspected sabotage, and last-minute changes to hardware are told by more than 70 NASA employees and its contractors. A companion to Rocket Ranch, it includes many diagrams and photographs, some never before published, to illustrate all aspects of the process. NASA's groundbreaking use of computers for testing and advanced management techniques are also covered in detail. This book will demystify the question of how NASA could build and launch Apollo missions using 1960s technology. You'll discover that there was no magic involved – just an abundance of discipline, willpower, and creativity.

You'll discover that there was no magic involved - just an abundance of discipline, willpower, and creativity.

It's 1969 and the United States is about to begin an adventure that mankind has dreamed of since the beginning of time — a trip to the moon. In a day-by-day, minute-by-minute countdown — in the control room and up in space — you'll experience the thrill of this breathtaking "One small step for man, one giant leap for mankind!" Countdown to the Moon is a companion to Steve Englehart's award-winning story of the Wright Brothers, Countdown to Flight. Together, these two Countdowns chronicle the liftoff and apex of mankind's eternal quest to leave the earth behind.

Jonathan Ward takes the reader deep into the facilities at Kennedy Space Center to describe NASA's first computer systems used for spacecraft and rocket checkout and explain how tests and launches proceeded. Descriptions of early operations include a harrowing account of the heroic efforts of pad workers during the Apollo 1 fire. A companion to the author's book Countdown to a Moon Launch: Preparing Apollo for Its Historic Journey, this explores every facet of the facilities that served as the base for the Apollo/Saturn missions. Hundreds of illustrations complement the firsthand accounts of more than 70 Apollo program managers and engineers. The era of the Apollo/Saturn missions was perhaps the most exciting period in American space exploration history. Cape Canaveral and Kennedy Space Center were buzzing with activity. Thousands of workers came to town to build the facilities and launch the missions needed to put an American on the Moon before the end of the decade. Work at KSC involved much more than just launching rockets. It was a place like none other on Earth. Technicians performed intricate operations, and hazards abounded everywhere, including lightning, fire, highly-toxic fuels, snakes, heat, explosives, LOX spills, and even plutonium. The reward for months of 7-day workweeks under intense pressure was witnessing a Saturn V at liftoff. For anyone who ever wished they had worked at Kennedy Space Center during the Apollo era, this book is the next best thing. The only thing missing is the smell of rocket fuel in the morning.

A comprehensive history of the Kennedy Space Center uses archival illustrations, aerial views, and extensive interviews with NASA personnel to tell the story. Reprint.

LONGLISTED FOR THE NATIONAL BOOK AWARD • YALSA EXCELLENCE IN NONFICTION FINALIST • A ROBERT F. SIBERT HONOR BOOK This beautifully illustrated, oversized guide to the people and technology of the moon landing by award-winning author/illustrator John Rocco (illustrator of the Percy Jackson series) is a must-have for space fans, classrooms, and tech geeks. Everyone knows of Neil Armstrong's famous first steps on the moon. But what did it really take to get us there? The Moon landing is one of the most ambitious, thrilling, and dangerous ventures in human history. This exquisitely researched and illustrated book tells the stories of the 400,000 unsung heroes--the engineers, mathematicians, seamstresses, welders, and factory workers--and their innovations and life-changing technological leaps forward that allowed NASA to achieve this unparalleled accomplishment. From the shocking launch of the Russian satellite Sputnik to the triumphant splashdown of Apollo 11, Caldecott Honor winner John Rocco answers every possible question about this world-altering mission. Each challenging step in the space race is revealed, examined, and displayed through stunning diagrams, experiments, moments of crisis, and unforgettable human stories. Explorers of all ages will want to pore over every page in this comprehensive chronicle detailing the grandest human adventure of all time!

Voted the Best Space Book of 2018 by the Space Hipsters The dramatic inside story of the epic search and recovery operation after the Columbia space shuttle disaster. On February 1, 2003, Columbia disintegrated on reentry before the nation's eyes, and all seven astronauts aboard were lost. Author Mike Leinbach, Launch Director of the space shuttle program at NASA's John F. Kennedy Space Center was a key leader in the search and recovery effort as NASA, FEMA, the FBI, the US Forest Service, and dozens more federal, state, and local agencies combed an area of rural east Texas the size of Rhode Island for every piece of the shuttle and her crew they could find. Assisted by hundreds of volunteers, it would become the largest ground search operation in US history. This comprehensive account is told in four parts: Parallel Confusion Courage, Compassion, and Commitment Picking Up the Pieces A Bittersweet Victory For the first time, here is the definitive inside story of the Columbia disaster and recovery and the inspiring message it ultimately holds. In the aftermath of tragedy, people and communities came together to help bring home the remains of the crew and nearly 40 percent of shuttle, an effort that was instrumental in

piecing together what happened so the shuttle program could return to flight and complete the International Space Station. Bringing Columbia Home shares the deeply personal stories that emerged as NASA employees looked for lost colleagues and searchers overcame immense physical, logistical, and emotional challenges and worked together to accomplish the impossible. Featuring a foreword and epilogue by astronauts Robert Crippen and Eileen Collins, and dedicated to the astronauts and recovery search persons who lost their lives, this is an incredible, compelling narrative about the best of humanity in the darkest of times and about how a failure at the pinnacle of human achievement became a story of cooperation and hope.

The Space Race of the mid-1900s took humankind where it had never gone before—the moon! This volume takes readers on their own moon mission as it outlines a contest of ultimate exploration, recounts the Apollo missions, and adds depth with stellar detail and stunning visual aids.

Chronicles the launch of the Apollo 11 and the story of Neil Armstrong and Buzz Aldrin's historic walk on the moon.

Exposes the behind-the-scenes events of the U.S. and Soviet space programs, describing key personalities, technologies, successes, and failures encountered along the way
