small Dutch trailer manufacturer through to its acquisition by US truck giant Paccar, and the development of the company to its present position as the top-selling truck in the UK and a major global brand. Buses, cars and army trucks are also covered, as well as details of how DAF has worked with various other truck makers, such as Leyland, International Harvester, Renault, RABA and GINAF, making the book essential reading for truck enthusiasts everywhere.

Bill Reid explores DAF lorries.

Following the success of his previous book, Scania at Work, Patrick Dyer takes a close look at another favourite of long haul drivers, DAF. Although now owned by the American company, PACCAR, and

with links to Leyland, the roots of DAF trucks are firmly in Eindhoven, Holland. The company started truck manufacture relatively late, but in the early 1970s it took an industry lead with its flagship 2800. The 'Supercontinental' version, with its wide tilt sleeper cab with two full-size bunks and its powerful 11.6-litre DAF engine was a natural for long-haul work. The successor 3300 and 3600 models took the company into the 1980s, running alongside Scania and Volvo as a long-distance driver's favourite. The 330 hp engine suited it for the heavy-duty special transport that became a feature of the period. Patrick W Dyer, author of two books for Old Pond - Scania at Work and Know Your Trucks - works in the automotive industry and is based in Essex. His new book is rich in photographs from the 1970s and '80s.

This is Volume II of Professor Parker's authoritative Official History of Privatisation, covering the period from the re-election of Margaret Thatcher in 1987 to the election of Tony Blair in 1997. Volume II considers in detail several of the major privatisations, including those of airports, steel, water, electricity, coal and

the railways, as well as a number of smaller ones. Each privatisation involved major challenges in terms of industrial restructuring, organising successful sales and, in a number of cases, establishing effective regulatory regimes. The policy evolved and new methods of selling and regulating were put in place that enabled further disposals to occur. Monolithic nationalised industries with their emphasis on the benefits of economies of scale, vertical integration and rationalisation, were replaced by industrial structures rooted in the importance of commercial management, risk taking and competition. In government departments and parts of the National Health Service, direct employees were replaced by private contractors, and private investment became a characteristic of public infrastructure in the form of PFI/PPP schemes. This study draws heavily on the

Read PDF Daf Truck

official records of the British government, to which the author was given full access and on interviews with the leading figures involved in each of the privatisations, including ex-ministers, civil servants, business and City figures, as well as academics that have studied the subject. This book will of great interest to students of privatisation, British political history and of business and economics in general.

Geoff Bell revolutionised truck drivers' accommodation by building Carlisle Truck Inn and running it for 10 years. He built up a fleet of 15 Volvo F86s running round the clock and thus helped forge the modern-day road haulage industry. Then Michael James Bland, his trusted chartered accountant and a partner at Dodd & Co Carlisle, turned out to be a professional
