Studienarbeit aus dem Jahr 2012 im Fachbereich Pflegemanagement / Sozialmanagement, Note: 1,0, Fachhochschule Jena, Sprache: Deutsch, Abstract: „Etwa seit Mitte des 20. Jahrhunderts haben chronische Krankheiten die akuten Infektionskrankheiten als häufigste Todesursache in den Industrieländern abgelöst“ (HINTZPETER u.a. 2011, 4). In Deutschland zählen die koronare Herzerkrankung und die Herzinsuffizienz „...zu den häufigsten und kostenträchtigsten Erkrankungen...“ (GERSTE 2011, 103). Um die Versorgungslage der Patienten zu verbessern, sind verschiedene gesundheitspolitische Maßnahmen ergriffen worden wie z.B. die Ergänzung des Disease-Management-Programmes „Koronare Herzerkrankung“ um das Modul „Herzinsuffizienz“. Ein Versorgungsprogramm stellt das HeartNetCare-HF© der Universität Würzburg dar, das poststationäre Patienten mit systolischer Herzinsuffizienz durch spezialisiertes „...Pflegepersonal per Telefon [...] überwacht, schult und den Hausarzt bei der Optimierung der Pharmakotherapie unterstützt“ (ANGERMANN u.a. 2011, 185). Dieses Programm wurde im Rahmen der INH-Studie untersucht und dessen Wirksamkeit belegt. Die Pflegenden können hierbei zwischen 100-120 Patienten betreuen, was von den Autoren als eine kostengünstige Intervention beschrieben wird. Die erforderlichen Kompetenzen werden den Pflegenden bei einer neu konzipierten Weiterbildung vermittelt. Bei näherer Betrachtung der Inhalte der telefonisch abgefragten Module fällt deren Komplexität vor allem im psychischen und motivatorischen Bereich auf. Fraglich scheint, ob diese Themenkomplexe im Rahmen der derzeitigen Ausbildung und einer Weiterbildung zur Herzinsuffizienzschwester ausreichend durch die Pflegenden ausgefüllt werden können oder ob hierfür eine akademische Qualifikation erforderlich ist. Ob mit diesem Versorgungsprogramm ein Schritt in Richtung Professionalisierung und einer weiteren Abgrenzung von Handlungsspielräumen gelingt, ist zu diskutieren. Im Ergebnis profitieren die Menschen mit Herzinsuffizienz von einer verbesserten, leitlinienorientierten Behandlung.

". . . every critical examination of HF therapy in the United States has documented that we are not using all the weapons in our arsenal. We know what works, yet we are not systematically applying these proven therapies." -- from the Introduction If you are interested in a better way to treat heart failure, this book is for you. Dr. Michael McIvor - who has taught thousands of healthcare professionals how to effectively care for patients with chronic HF through CME symposia - takes a logical, step-by-step approach to setting up and operating the kind of program that reduces hospital admissions and improves patient care. Establishing a Heart Failure Program: The Essential Guide answers the different questions posed by physicians, nurse practitioners, nurses, and hospital administrators, all of whom need to work as a team to achieve success. The three major sections of the book address: Taking the first steps toward building your heart failure program - developing a business plan, choosing your model of care, and making accurate financial projections Assembling the pieces of your program - managers, front line staff, and the physical facility Day-to-day operations A companion website presents forms you can download and use in your own heart failure center. Drawing from experience, Dr. McIvor helps you avoid common problems by identifying potential problems and sharing advice that has proven effective to your colleagues. He gives you the essential tools - unavailable elsewhere - to set up and maintain a heart failure program that achieves superior clinical outcomes.
