EFFECTIVE TECHNICAL COMMUNICATION by Ashraf Rizvi

Good technical communication is accurate, clear, concise, coherent, and appropriate. In the prose of science and technology, these qualities are sometimes difficult to achieve. Not only do science and technology depend heavily on specialized concepts and terminologies, but they also make extensive use of numbers and graphics. The following example shows how the different qualities of technical prose work together.

Effective Technical Communication is designed to serve as a practical guide and useful resource for scientists, engineers, and researchers. It addresses the need of practitioners engaged in the exchange of technical information to effectively share their ideas with, and make impact on, their peers. The book provides guidelines, technical conventions, and graphical and visual aids for communicating effectively. It discusses the use of scientific vocabulary and various forms of writing, starting from simple forms such as paragraph and precis writing to more advanced forms such as scientific and engineering reports and papers. Written in an easy-to-understand style, the text is supported with numerous illustrative examples. The correct use of language, the dos and don'ts of communication and the effective use of speech communication have also been discussed in detail.

This text book focuses on helping the students to develop skills in all the four dimensions of communication, namely listening, speaking, reading, and writing. While maintaining a practice-oriented approach, the book also provides a comprehensive review of the principles of technical communication. Simple presentation, step-by-step discussion, use of examples, and the practice modules will help students in mastering the subject.

By combining research sources with an annotated bibliography this reference title locates the sources that offer practical solutions to business and technical communication problems.

Engineering? Computer Science? Marketing? Nursing? Whatever your field of study or profession, one skill is essential: the ability to communicate effectively. TECHNICAL COMMUNICATION leads you through the principles and strategies of effective technical writing and speaking. This book teaches you how to consider audience, purpose, and persuasion while adapting organization, graphics, language, and design to prepare a variety of important documents, such as e-mail messages, letters, job applications, instructions, technical descriptions, reports, proposals, and technical presentations. This Canadian book will be an indispensable resource during your studies and in the professional world.

The text material has been restructured to provide a more balanced and exhaustive coverage of the subject.The text discusses the core concepts of technical communication and explains them with the help of numerous examples and practice exercises. The book also provides support for soft skills laboratory sessions through a companion CD.With its in-depth coverage and practical orientation, the book is useful not only for students, but also as a reference material for corporate training programmes.

Teachers of technical writing are frequently handicapped by a lack of material to back up discussions in the classroom and in textbooks. This title helps to overcome this weakness.

This compact but complete guide shows that less is more—with fewer extraneous details getting in the way of students trying to learn on the run, it allows them to focus on the most important principles of effective technical communication. The Concise Guide takes a rhetorical approach to technical communication; instead of setting up a list of rules that should be applied uniformly to all writing situations, it introduces students to the bigger picture of how the words they write can affect the people intended to read them. Assignments and exercises are integrated throughout to reinforce and test knowledge.

Disk contains: Template of sample student laboratory report -- Templates of ten different type of business letters and memos -- Templates or résumés and letters from Chp. 25.
