Valve p0404 Egr Error Code
P0404

P0404 is a generic OBD II fault code that indicates that there is an issue with the Exhaust Gas Recirculation (EGR) circuit. The Engine Control Module (ECM) has detected that the EGR circuit is either out of range or not functioning properly. The purpose of the EGR system is to burn fuel more efficiently.

P0404 - Exhaust gas recirculation (EGR) system range ...

Often times code P0404 does not actually indicate that there is something wrong with the EGR valve itself,

Read Book Egr Error Code P0404

but actually that the EGR sensor is telling your PCM that the proper amount of EGR needed to flow back into your cylinders and cool them is not present.

Automotive

Diagnostic Trouble Code (DTC) P0404 stands for Exhaust Gas Recirculation Circuit Range/Performance Problem. It is a generic OBD trouble code that activates if the powertrain control module (PCM) detects erratic Exhaust Gas Recirculation (EGR) valve performance. Code P0404 activates when the car computer detects

erratic EGR valve performance.

P0404 Code: Exhaust Gas Recirculation Circuit Range
...

P0404 is a diagnostic trouble code (DTC) for "Exhaust Gas Recirculation Circuit Range/Performance". This can happen for multiple reasons and a mechanic needs to diagnose the specific cause for this code to be triggered in your situation. Our certified mobile mechanics can come to your home or office to perform the Check Engine Light diagnostic. Once we are able to diagnose the problem, you will be provided with an

P0404 OBD-II Trouble Code:
Exhaust Gas Recirculation
...

The Error Code P0404 means the position of the EGR valve is above or below range. Meaning, if the PCM determines that the valve should be operating, but feedback circuit system shows that it is closed, it will trigger the error code. The code is also triggered when the PCM determines the valve should be closed, and the feedback shows it's open.

Clean or Replace? It's not
difficult to clean your
valve, although it is time-
consuming. Remember to let
your engine cool thoroughly
before doing any service
like this. The exhaust
gasses are very hot and it
can take some time for your
engine components to cool
down after heating up to
full operating temperature.
