FIDIC Client-Consultant Model Services Agreement 4th ...

History of FIDIC: As a result of a search for independent expert consultants for the World Fair Exhibitions in 1913, a number of consulting engineers met to discuss the possibility of forming a global Federation. The meeting was a success in that it led to the formal constitution on 22 July 1913 of FIDIC, F\u00e9d\u00e9ration Internationale des Ing\u00e9nieurs Conseils, or later, the International ...

The FIDIC Client/Consultant Model Services Agreement (fourth edition, 2006) - usually known as the White Book - was a rather frustrating form for lawyers. Happily, the new White Book (fifth edition, 2017) addresses some of the frustrations and is a more balanced starting point.

Agreement - FIDIC Terms

Client/Consultant Model Services Agreement (4th edition 2006) The services defined in Appendix 1 [Scope of Services] to be performed by the Consultant in accordance with the Agreement which comprise Normal Services, Additional Services and Exceptional Services. Client/Consultant Model Services Agreement (3rd edition 1999)

In September 1999, FIDIC introduced its new Suite of Contracts, which included a "new" Red, Yellow, Silver and Green forms of contract. The "new" Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: - background and concepts of the various forms of contract; - a detailed comparison of the wording of the 1999 forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; - analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; - a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; - a much enlarged discussion of the meaning of "claim" and "dispute" and the types of claim with a discussion of the Notice provision in the 1999 form of contract for the submittal of claims by a contractor and by an employer; - the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and - five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 'Orange Book'). These conditions, known as the 'FIDIC rainbow', were the Conditions of Contract for: 1 Construction, the so-called Red Book, for works designed by the Employer 1 Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor 1 EPC/Turnkey Projects, the so-called Silver Book, for works designed by the Contractor The first is intended for construction works where the Employer is responsible for the design, as for the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/Turnkey Contract has a two-party arrangement, generally with an Employer's Representative as one of the parties.

'It is clear that there is less chance of failure to observe contract compliance using [this] book, than reliance on reading through the appropriate clauses in the contract. A big plus is that those using the book will find answers to queries relating to contractual issues arising from the FIDIC contracts conditions in a fraction of the time it would take if it were necessary to study the full text. For those using the FIDIC forms for the first time, or infrequently, this book is a must, whilst experienced users will find it a valuable memory jogger. Whichever category the reader falls into, using this book should improve performance. The book is ideal for engineers, quantity surveyors, contract managers and any person whose job it is to understand the workings of a FIDIC contract.' From the book's Foreword by Roger Knowles The most important part of any contract is the obligations of the parties, the time frames in which the parties must perform these obligations, and the consequences of failing to meet them. Failure to carry out obligations correctly is a serious risk and common source of contention or claims. This practical ready-reference on the contractual obligations of the various parties for a FIDIC construction contract promotes efficient administration of construction projects, prevents contention and aids an easier understanding of their obligations. The FIDIC Contracts: obligations of the parties is presented in an easily-referenced format, with the obligations set out in tabular form and clear summaries for each type of contract given in separate sections for the Employer, the Contractor and the Engineer. This guide's ready-reference style will enable the project manager, quantity surveyor or contract manager to quickly check that his company is performing the required obligations correctly - and also to ensure the other parties are doing the same.

FIDIC Contracts: Law and Practice is sure to become the leading industry standard guide to using the FIDIC forms, and is the only book to date which deals with the whole suites of contracts, including the new gold book for Design, Build and Operate projects. The White & Case work is outstanding in its detailed consideration and treatment of the legal aspects of the interpretation and application of the Conditions, touching on many points that most people would not have encountered. Humphrey Lloyd, International Construction Law Review [2010] ICLR 386
