World-renowned author Jack J. Kanski and co-author Kon K. Nischal provide a new, complete, visual catalog of clinical ophthalmologic signs uniquely organized by anatomical site. This reference is an essential, first of its kind tool in ophthalmology specifically geared toward differential diagnosis. Pertinent information is succinctly provided for each disorder including diagnostic signs, ocular and systemic associations, causes, and other indicators relating to patient history and confirmation of diagnosis. More than 1,500 high-quality, color photographs and nearly 50 angiograms throughout allow you to compare directly with patient symptoms as they appear in clinical practice. This reference is a desk-side companion every ophthalmologist and optometrist will use repeatedly to match and verify diagnosis, and a valuable review tool for trainees. Includes a complete catalog of all clinical signs in ophthalmology Organizes chapters by eye region for speedy diagnosis Provides 1,500 high-quality photos and nearly 50 angiograms for comparative analysis in a clinical setting Contains a mini contents table at the beginning of each chapter to help readers navigate the book Features a special speed-reader format to help you quickly isolate key facts by icons and summary tables Spanish version also available, ISBN: 84-8174-395-X

This book aims to demystify clinical trials. It is divided into five sections: fundamentals of trial design, alternative trial designs, basics of statistical analysis, special trial issues in data analysis, and reporting of trials. Using simple language the book explains with illustrations of numerous trial examples, the conceptual and methodological issues that occur at all stages of clinical trial covering trial design, conduct, analysis and reporting. The book is an educational and approachable reference in a difficult area of medicine where clinicians often feel uncertain and this material helps them review, appraise and publish trials and clinical evidence.
