elementary school auditorium, this book will help you to create readable, professional, publication-quality notation. If you can read musical notes, you can sing any song or play any piece. But musical notes have not always been here. Long ago, songs were memorized. If songs were forgotten, they were lost forever. Thanks to one man, Guido d'Arezzo, music now can last forever.

Musical notation is a powerful system of communication between musicians, using sophisticated symbolic, primarily non-verbal means to express musical events in visual symbols. Many musicians take the system for granted, having internalized it and their strategies for reading it and translating it into sound over long years of study and practice. This book traces the development of that system by combining chronological and thematic approaches to show the historical and musical context in which these developments took place. Simultaneously, the book considers the way in which this symbolic language communicates to those literate in it, discussing how its features facilitate or hinder fluent comprehension in the real-time environment of performance. Moreover, the topic of musical as opposed to notational innovation forms another thread of the treatment, as the author investigates instances where musical developments stimulated notational attributes, or notational innovations made practicable advances in musical style.

This book is designed to serve as a practical guide to music handwriting and music-writing procedures.
