In this engrossing memoir, one of the most controversial, influential, and inspirational figures in African politics today gives the full story of his crusade to save Kenya's natural resources, and specifically the African elephant—a crusade that set him against internal corruption, poverty, and dangerous criminals. Sometimes at the risk of his own life, Leakey's love of Kenya, and his convictions about the direction his country—and all of sub-Saharan Africa—must take to survive, have been unshakable. *Wildlife Wars* is the odyssey of an extraordinary man in an extraordinary land.

Ford Madov Ford is a major figure of the modernist age, yet many of his works do not fulfill the expectations associated with the category of modernism. In *Ford Madov Ford and the Misfit Moderns*, the author examines the ways in which Ford, alongside other 'misfit moderns' (Richard Aldington, Arnold Bennett, Joseph Conrad, Robert Graves, Siegfried Sassoon, H. G. Wells, and Rebecca West), destabilises the fundamental structures and forces that shape all narratives, from the processes of characterisation and plotting to the distinction between autobiography and fiction. In so doing, Ford exhibits a form of 'in-betweenness' that constitutes an exemplary responsiveness to the conditions of modernity whilst challenging many of our assumptions about early twentieth-century writing. Offering original readings of Ford's Edwardian fiction and First World War writing, this book poses wide-ranging questions about the nature of narrative and the distinction between modernism and modernity. -- Book cover.

This study investigates the acquisition of Functional Categories from the perspective of self-organization. Syntax emerges through a major bifurcation of the dynamical language system. Dynamical notions such as precursor, oscillation, symmetry-breaking, and trigger are explanatory tools for the dynamics of early child language as evidenced in the acquisition of compounding, case-marking, finiteness, V2, wh-questions, etc. The book addresses researchers from various theoretical camps: generative, functional, connectionist, by giving new answers to old questions in the light of a novel challenging theory: self-organization.
