But perhaps more importantly, she goes one step further, teaching you the inner work of feng shui using her own Inner Wisdom Bagua map, which correlates the characteristics, beliefs, and attitudes that will help you flourish in each area of your life. Sharing anecdotes from her own experience switching careers from an ESPN executive to a feng shui consultant, as well as her clients' success stories, Grace walks you through each area of the standard and Inner Wisdom Bagua maps to create unique solutions for your life. She teaches you to harness the power of your intuition to determine what's true and important for you. And she offers practical tools based on concepts such as Yin and Yang, the Five Elements, and the Magical Day, to help you figure out which enhancements will be the most effective in transforming your life. By celebrating key principles like universal gratitude, a positive outlook, and living in the present moment, she shows you how to manage life on a day-to-day basis and points you toward your life's true purpose.

Love is one of our strongest biological drives, but it can be frustratingly elusive and misunderstood. Music, literature, and movies are filled with common folklore about love and millions of TV viewers tune in to shows like *The Bachelor* and read the latest relationship tome with one simple hope: to uncover some nugget of mystic wisdom that will help them understand the exciting, addictive, insane experience called 'love'. *Men Chase, Women Choose*, is the first book to offer cutting-edge research that explains how the brain works when two people first meet, start to date, fall in love, and then move into long-term, real love. Maslar's unique approach brings together the latest and most relevant neurological, physiological, and biochemical research on the science of love while incorporating stories and examples of composite characters based on participants of her popular classes and seminars. She explains that 'love' is actually neural activity as well as the presence or absence of certain neurotransmitters that bathe the brain, and it follows a precisely timed path of four, easy-to-understand phases: the exciting norepinephrine-charged meeting phase; the addictive dopamine dating phase; the insane falling-in-love and losing your mind phase; and finally, the safe, warm and wonderful, true, long-term love phase. For the past decade Maslar has made it her mission to learn all she can about the science behind falling in love, including its evolutionary benefits. Her goal--and the purpose of this book--is to help men and women find and maintain love by understanding and applying the science behind it. The bottom line? We actually can have long-lasting, nourishing, exciting, passionate love with little or no risk!
