Home Healthcare Home Birthing To Hospice Care

Midwife-led care. The Home from Home Birth Centre is midwife-led, meaning it is staffed by midwives and maternity support workers. Midwives support women during labour to have a normal birth, using options such as hydrotherapy (birthing pool), aromatherapy, massage and entonox (gas and air) for comfort and for managing pain. Opiate analgesia (injection of diamorphine) is also available.

Home from Home birth centre - Guy's and St Thomas

Discuss with your health care provider the signs and symptoms that might necessitate going to a hospital and how a transfer will affect your birthing plan. Ideally, your home or other planned birth location is within 15 minutes of a hospital with 24-hour maternity care. Make sure you have access to transportation.

Home birth: Know the pros and cons - Mayo Clinic

For women having their second or subsequent baby, a planned home birth is as safe as having your baby in hospital or a midwife-led unit. However, for women having their first baby, home birth slightly increases the risk of a poor outcome for the baby (from 5 in 1,000 for a hospital birth to 9 in 1,000 – almost 1% – for a home birth).

New advice encourages more home births - NHS

For women having their second or subsequent baby, a planned home birth is as safe as having your baby in hospital or a midwife-led unit. It's rare but, if something goes seriously wrong during your labour at home, it could be worse for you or your baby than if you were in hospital with access to specialised care. If you give birth at home, you'll be supported by a midwife who will be with you while you're in labour.
