This is the book for the motorcyclist who wants to do it right! The Motorcycle Safety Foundation’s Guide to Motorcycling Excellence is the most complete and authoritative guide to motorcycle safe-riding techniques and strategies. More than one million students have completed courses developed by the Motorcycle Safety Foundation, and this book is the culmination of what this leading rider-training organization has learned about teaching students of all ages and experience levels. It is the perfect refresher for anyone who has taken an MSF class and it will be an eye-opener for those who have not yet taken a formal training course. In a clear, engaging style with detailed diagrams and illustrations, the book covers rider attitude, proper gear, basic and advanced street skills, and performance, as well as skill maintenance and troubleshooting. Topics include how to stop quickly when necessary; avoiding traffic hazards; applying evasive maneuvers; countersteering for better control; traveling safely and skillfully in a group; identifying and fixing mechanical problems; riding smoothly at high and low speeds; maintaining momentum in off-highway riding; and much, much more. The Motorcycle Safety Foundation’s Guide to Motorcycling Excellence is a remarkable source of riding wisdom and the definitive reference for the sport.

For his eighth birthday, Emilio Scotto received a World Atlas. Promptly he announced his plan to make a route that would pass through all the countries of the world, a route he named BLUE ROAD ONE. When, some years later, he found himself astride a black 1100 Honda Gold Wing motorcycle, Blue Road One beckoned, and Scotto set off on a journey that would last more than a decade, take him virtually everywhere in the world, and land him in the Guinness Book of World Records. This is his story, a thrill ride that begins in his native Argentina, crosses Panama in the tumultuous time of Noriega, Mexico in the midst of an earthquake, and finds him broke in L.A. where, in a chance meeting, Muhammad Ali gives him fifty dollars and a signed book. Breaching the Iron Curtain, crossing the Berlin Wall at Checkpoint Charlie, being blessed by the Pope, set upon by cannibals in Sierra Leone, fleeing Somalia on a freighter, Scotto’s adventures would be unbelievable if they weren’t true. His tale of touring the world from Tunisia to Turkey, Petra to Afghanistan, Yugoslavia to Singapore, traveling miles enough to take him to the moon and back, is unlike any ever told. Come along, for the ride of a lifetime.

This book explores the opportunities and challenges of the sharing economy and innovative transportation technologies with regard to urban mobility. Written by government experts, social scientists, technologists and city planners from North America, Europe and Australia, the papers in this book address the impacts of demographic, societal and economic trends and the fundamental changes arising from the increasing automation and connectivity of vehicles, smart communication technologies, multimodal transit services, and urban design. The book is based on the Disrupting Mobility Summit held in Cambridge, MA (USA) in November 2015, organized by the City Science Initiative at MIT Media Lab, the Transportation Sustainability Research Center at the University of California at Berkeley, the LSE Cities at the London School of Economics and Politics and the Innovation Center for Mobility and Societal Change in Berlin.

'Poster Art' showcases an international collection of graphic design in this continually developing area. From mass-market designs to exclusive, limited-edition works, it explores both the creative inspiration behind the work, as well as looking at the practical considerations.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.
