Facilities planning for tourism, hospitality and events (THE) is an important subject from both theoretical and applied perspectives, as land, property and resources represent major components of the foundation of the industry. As future managers, it is imperative that students have a sound basic knowledge of property and the various resources, systems and services associated with it. Covering important contemporary subjects such as sustainable planning and environmental management, this book considers the planning, development and management of facilities operations from several key perspectives, drawing upon the expertise of complementary experts in the design, management and development of THE facilities.

Developing Hospitality Properties and Facilities sets out some of the key issues in developing hospitality properties from the hospitality manager's perspective. From the original concept, through each part of the process, it provides an essential guide for students and professionals on how to manage hospitality facilities to their best effect, using a model-based insight into the process in an informed, but non-technical way. Now in its second edition, this successful text has been updated with new international case studies from companies such as MyTravel, Disneyland Paris Hotel, Elysium Beach Resort Cyprus and many others. It also includes new chapters from well-known authors. With contributions from both academics and practitioners, this book looks at design, building issues, operational relationships, and therefore provides the
