The FAAT List is not designed to be an authoritative source, merely a handy reference. Inclusion recognizes terminology existence, not legitimacy. Entries known to be obsolete are included because they may still appear in extant publications and correspondence.

Clinical Naturopathic Medicine is a foundation clinical text integrating the holistic traditional principles of naturopathic philosophy with the scientific rigour of evidence-based medicine (EBM) to support contemporary practices and principles. The text addresses all systems of the body and their related common conditions, with clear, accessible directions outlining how a practitioner can understand health from a naturopathic perspective and apply naturopathic medicines to treat patients individually. These treatments include herbal medicine, nutritional medicine and lifestyle recommendations. All chapters are structured by system and then by condition, so readers are easily able to navigate the content by chapter and heading structure. The content is designed for naturopathic practitioners and students (both undergraduate and postgraduate levels) and for medical and allied health professionals with an interest in integrative naturopathic medicine. detailed coverage of naturopathic treatments provides readers with a solid understanding of the major therapeutic modalities used within naturopathic medicine each system is reviewed from both naturopathic and mainstream medical perspectives to correlate the variations and synergies of treatment only clinically efficacious and evidence-based treatments have been included information is rigorously researched (over 7500 references) from both traditional texts and recent research papers the content skilfully bridges traditional practice and EBM to support confident practitioners within the current health care system

Each topic is treated from the beginning, without assuming prior knowledge. Each chapter starts with an opening section covering an application. These help students to understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and revision. Checkpoints in each chapter test students' understanding and support their private study. A selection of questions are included at the end of each chapter, many form past examination papers. Suggested answers are provided in the Answers Key.

OUR DUMB WORLD is the world's most comprehensive fake atlas: a repository of all known information about the planet Earth (except where covered by clouds). In late 2007 the hardcover edition became one of the hottest books of the holiday season, entertaining and offending hundreds of thousands of readers around the globe. This new, easy-to-carry paperback edition is perfect for the intrepid traveler to any of the world's exotic locales--from Afghanistan, "Allah's Cat Box," to Ukraine, "the Bridebasket of Europe," to the USA's own Nevada, "Where Everyone's a Loser." Packed with beautiful full-color maps and framed with inaccurate essays about all the world's peoples and places, OUR DUMB WORLD is a gut-busting send-up in which no nation escapes unscathed. "Bottom line: laughed my head off." --Deirdre Donahue, USA Today

Each topic is treated from the beginning, without assuming prior knowledge. Each chapter starts with an opening section covering an application. These help students to understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and revision. Checkpoints in each chapter test students' understanding and support their private study.
