The Industrialisation of the Continental Powers is both a broad survey of the process of European industrialisation from the late eighteenth century to the First World War, and also a closely argued comparative economic study of how this process was experienced by different great powers.

The Industrialisation of the Continental Powers is both a broad survey of the process of European industrialisation from the late eighteenth century to the First World War, and also a closely argued comparative economic study of how this process was experienced by different great powers.

A set of books on the Industrial Revolution, these comprehensive volumes cover the history of steam shipping, iron and steel production, and railroads—three interrelated enterprises that helped shift the Industrial Revolution into overdrive.

About national and international power in the "modern" or Post Renaissance period. Explains how the various powers have risen and fallen over the 5 centuries since the formation of the "new monarchies" in W. Europe.

Written for the layman as well as the economic historian this famous and much-used book not only presents a general synthesis of the pattern of European industrialisation; it also provides material for a comparative study by illustrating, in separate case studies, the specific characteristics of development in Britain, France, Germany, Russia and Italy.

Kristine Bruland looks at the Norwegian experience to show how a small economy created a technological infrastructure.
