Johann Sebastian Bach was one of a long list ... organist and violinist. For the most part of his career, Bach worked as an organist and choirmaster at various churches throughout Germany.

Bach composed these Inventions in 1722/3 for the instruction in keyboard playing and composition of his eldest son, Wilhelm Friedemann, who was then just 12. Richard Jones's edition of these pieces is also available from ABRSM in a 'Signature' Series edition, where they are combined with the (three-part) Sinfonias and given more textual commentary.

This newly engraved edition will be very useful to all piano students and teachers. A necessary step to prepare for the Preludes and Fugues. Kalmus Editions are primarily reprints of Urtext Editions, reasonably priced and readily available. They are a must for students, teachers, and performers.

"Your edition of the Bach Inventions is an excellent, practical edition with a splendid foreword. Students should consider it a 'must' and I look forward to introducing it to mine."---Igor Kipnis.

This diversified collection guides students to develop stylistic performances of Bach's keyboard works. Among the 27 selections are numerous menuets, "short" preludes and suite movements. The introductory material contains an excellent discussion of ornamentation, rhythm, articulation, tempo and dynamics in the keyboard music of this master composer.
