How can all the nuts and bolts of a business be analyzed effectively in one comprehensive model and translated into a business plan? At various points in the life of a business, entrepreneurs will need to take stock of their ideas and plans and reformulate them in business and financial terms. How to Create a Successful Business Plan is about dynamic planning for businesses and provides a structured approach to business planning that focuses on the main components of the business model, while addressing key issues often raised by investors and potential business partners. It gives the company order and structure and helps managers optimize team integration and resources. The book provides a framework in which professionals from a broad range of backgrounds can work together on a successful business plan. Readers will find that the business model is discussed in depth, yet in accessible and easily understood terms. Contents: An Introduction to the Business Plan: What is a Business Plan? The Goals of the Business Plan Process Planning the Business: Gathering Information and Analyzing the Business Environment Planning The Written Business Plan: Writing the Business Plan Confidentiality and Disclosure Getting the Most Out of Your Business Plan: Promoting Your Business Plan Readership: Undergraduate and graduate business and management students; independent entrepreneurs; executives (in high-tech firms or in the more established industries); investors (such as angels or venture capitalists); and other potential business partners and service providers.

In the age of post-digital architecture and digital materiality, *This Thing Called Theory* explores current practices of architectural theory, their critical and productive role. The book is organized in sections which explore theory as an open issue in architecture, as it relates to and borrows from other disciplines, thus opening up architecture itself and showing how architecture is inextricably connected to other social and theoretical practices. The sections move gradually from the specifics of architectural thought – its history, theory, and criticism – and their ongoing relation with philosophy, to the critical positions formulated through architecture’s specific forms of expression, and onto more recent forms of architecture’s engagement and self-definition. The book’s thematic sessions are concluded by and interspersed with a series of shorter critical position texts, which, together, propose a new vision of the contemporary role of theory in architecture. What emerges, overall, is a critical and productive role for theory in architecture today: theory as a proposition, theory as task and as a “risk” of architecture.
