Languages at War | Imperial War Museums

Welcome to Languages at War The University of Reading, with the University of Southampton and the Imperial War Museum, London, has received funding from the AHRC for a major project on Languages at War: policies and practices of language contacts in conflict.

Languages at War home page - University of Reading

Language encounters were and are an everyday part of the multinational peacekeeping deployment in Bosnia-Herzegovina. We aim to investigate the policies and practice of language encounters in the Bosnian peacekeeping operation between 1995 (the end of the war in Bosnia-Herzegovina) and 2000.

Languages at War | Modern Languages and Linguistics ...

Government, the military, and multilateral agencies develop language policies intended to prepare their soldiers to work with foreign allies, meet foreign enemies and deal with civilians who do not speak their language. In the context of armed conflict, soldiers experience the reality of these language encounters at first hand.

About Languages at War - University of Reading

Emphasising the significance of foreign languages at the centre of war and conflict, this book argues that 'foreignness' and foreign languages are key to our understanding of what happens in war. Through case studies the book traces the role of languages in intelligence, military deployment, soldier/civilian meetings, occupation and peace building.

War Museum Discussant: Samantha Cairns (Museums, Libraries and Archives London) 4.00-4.15: Coffee 4.15-4.45: Closing remarks Nick Stansfield (Freelance international contractor): Language encounters on the ground This project is supported by the LANGUAGES AT WAR: POLICIES AND PRACTICES OF LANGUAGE CONTACTS IN CONFLICT

Languages at War places foreign languages at the core and centre of war and conflict, arguing that 'foreignness' and foreign languages are key to our understanding of what happens on the ground of war. Using two case studies - the liberation/occupation of Western Europe (1944-47), and peacekeeping/peace building in Bosnia-Herzegovina (1995-2000) - it traces the role of languages in intelligence, pre-deployment preparations, deployment, soldier-civilian meetings, occupation and peace building. It examines the language policies which are developed in war, and the language experiences of those who are caught up in conflict. Their voices, and in particular the testimonies of the language intermediaries in war - the interpreters/translators - echo throughout these pages.

Originally presented as the author's thesis (doctoral)--City University, London, 2010, under the title: Languages at war in Lusophone Africa.

During Germany's occupation of France in WWII, French regional languages became a way for people to assert their local identities. This book offers a detailed historical sociolinguistic analysis of the various language policies applied in France's regions (Brittany, Southern France, Corsica and Alsace) before, during and after WWII.

With several terms from the First World War still present in modern speech, Languages and the First World War presents over 30 essays by international academics investigating the linguistic aspects of the 1914-18 conflict. The

first of the two volumes covers language change and documentation during the period of the war, while the second examines the representation and the memory of the war. *Communicating in a Transnational War* examines languages at the front, including the subject of interpretation, translation and parallels between languages; communication with the home front; propaganda and language manipulation; and recording language during the war. *Representation and Memory* examines historiographical issues; the nature of representing the war in letters and diaries; the documentation of language change; the language of representing the war in reportage and literature; and the language of remembering the war. Covered in the process are slang, censorship, soldiers' phrasebooks, code-switching, borrowing terms, the problems facing multilingual armies, and gendered language.

This book examines language change and documentation during the First World War. With contributions from international academics, the chapters cover all aspects of communicating in a transnational war including languages at the front; interpretation, translation and parallels between languages; communication with the home front; propaganda and language manipulation; and recording language during the war. This book will appeal to a wide readership, including linguists and historians and is complemented by the sister volume *Languages and the First World War: Representation and Memory* which examines issues around the representation and memory of the war such as portrayals in letters and diaries, documentation of language change, and the language of remembering the war.

This Handbook provides a state-of-the-art account of research in language policy and planning (LPP). Through a critical examination of LPP, the Handbook offers new direction for a field in theoretical and methodological turmoil as a result of the socio-economic, institutional, and discursive processes of change taking place under the conditions of Late Modernity. Late Modernity refers to the widespread processes of late capitalism leading to the selective privatization of services (including education), the information revolution associated with rapidly changing statuses and functions of languages, the weakening of the institutions of nation-states (along with the strengthening of non-state actors), and the fragmentation of overlapping and competing identities associated with new complexities of language-identity relations and new forms of multilingual language use. As an academic discipline in the social sciences, LPP is fraught with tensions between these processes of change and the still-powerful ideological framework of modern nationalism. It is an exciting and energizing time for LPP research. This Handbook propels the field forward, offering a dialogue between the two major historical trends in LPP associated with the processes of Modernity and Late Modernity: the focus on continuity behind the institutional policies of the modern nation-state, and the attention to local processes of uncertainty and instability across different settings resulting from processes of change. The Handbook takes great strides toward overcoming the long-standing division between "top-down" and "bottom-up" analysis in LPP research, setting the stage for theoretical and methodological innovation. Part I defines alternative theoretical and conceptual frameworks in LPP, emphasizing developments since the ethnographic turn, including: ethnography in LPP; historical-discursive approaches; ethics, normative theorizing, and transdisciplinary methods; and the renewed focus on socio-economic class. Part II examines LPP against the background of influential ideas about language shaped by the institutions of the nation-state, with close attention to the social position of minority languages and specific communities facing profound language policy challenges. Part III investigates the turmoil and tensions that currently characterize LPP research under conditions of Late Modernity. Finally, Part IV presents an integrative summary and directions for future LPP research.

This Handbook maps the contours of an exciting and burgeoning interdisciplinary field concerned with the role of language and languages in situations of conflict. It explores conceptual approaches, sources of information that are available, and the institutions and actors that mediate language encounters. It examines case studies of the role that languages have played in specific conflicts, from colonial times through to the Middle East and Africa today. The contributors provide vibrant evidence to challenge the monolingual assumptions that have affected traditional views of war and conflict. They show that languages are woven into every aspect of the making of war and peace, and demonstrate how language shapes public policy and military strategy, setting frameworks and expectations. The Handbook's 22 chapters powerfully illustrate how the encounter between languages is integral to almost all conflicts, to every phase of military operations and to the lived experiences of those on the ground, who meet, work and fight with speakers of other languages. This comprehensive work will appeal to scholars from across the disciplines of linguistics, translation studies, history, and international relations; and provide fresh insights for a broad range of practitioners interested in understanding the role and implications of foreign languages in war.

This book addresses, for the first time, the question of how development NGOs attempt to 'listen' to communities in linguistically diverse environments. NGOs are under increasing pressure to demonstrate that they 'listen' to the people and communities that they are trying to serve, but this can be an immensely challenging task where there are significant language and cultural differences. However, until now, there has been no systematic study of the role of foreign languages in development work. The authors present findings based on interviews with a wide range of NGO staff and government officials, NGO archives, and observations of NGO-community interaction in country case studies. They suggest ways in which NGOs can reform their language policies to listen to the recipients of aid more effectively.

Through detailed case studies ranging from the 18th century until today, this book explores the role of foreign languages in military alliances, in occupation and in peace building. It brings together academic researchers and practitioners from the museum and interpreting worlds and the military.

The Routledge Handbook of Translation and Politics presents the first comprehensive, state of the art overview of the multiple ways in which "politics" and "translation" interact. Divided into four sections with thirty-three chapters written by a roster of international scholars, this handbook covers the translation of political ideas, the effects of political structures on translation and interpreting, the politics of translation and an array of case studies that range from the Classical Mediterranean to contemporary China. Considering established topics such as censorship, gender, translation under fascism, translators and interpreters at war, as well as emerging topics such as translation and development, the politics of localization, translation and interpreting in democratic movements, and the politics of translating popular music, the handbook offers a global and interdisciplinary introduction to the intersections between translation and interpreting studies and politics. With a substantial introduction and extensive bibliographies, this handbook is an indispensable resource for students and researchers of translation theory, politics and related areas.
