Natural Language Semantics discusses fundamental concepts for linguistic semantics. This book combines theoretical explanations of several methods of inquiry with detailed semantic analysis and emphasises the philosophy that semantics is about meaning in human languages and that linguistic meaning is cognitively and functionally motivated.

The only guide written exclusively for this specialized market, this title provides the most up-to-date marketing resource information available to beginning and advanced writers, freelancers, editors, publishers, publicists, and all others interested in, or involved with, writing.

A trustworthy guide to understanding the Book of Revelation

I'm told the dead are all around us. I wouldn't know about that, I see only the violently slain. They can be victims of hit-and-run, innocents caught in a cross-fire, the murdered. They whisper to me and they never, ever, forget the face of their killer. I've learned to live with my uncanny ability, in fact I've made a career out of it. The departed aren't the only supernaturals I see. No, they're not vampires or werewolves or fae - those things don't exist. We live side by side with what some call the Otherworldly. That's too much of a mouthful for me, I call them demons. If you saw them as I do, you'd know why. Right now I'm trying to track down a missing six year-old boy whose mother was murdered. Or maybe she wasn't. To further complicate the case, Clarion PD gave me a partner I'd rather shoot than work with. I can't tell them he's a demon. They'd think I'm crazy. I'm Tiff Banks. Welcome to my world.

"How do I know I covered all the requirements? Where do I begin? When should I stop? Did I miss something that will result in unpleasant surprises down the road?" If you are a Business Analyst, these questions will certainly mean something to you. You've probably asked yourself these questions at one point or another when you were assigned your early requirements development tasks. In this book, I introduce a requirements development roadmap that will guide you from start to finish. It is a plan carefully prepared and organized around consecutive stations. At each station, I tell you: 1. The target objective, and why you need to think about that particular objective at that specific point in time 2. Which elicitation techniques will best serve the objective, and which questions to ask in order to capture the information you need 3. Which analysis tools to apply in order to analyze the information from different angles 4. How to document the output of the exercise that you just performed

This book covers all the factors any ceramic artist should consider when going "green" including: fuels and alternative firing technology; sustainable ways to collect and use clay; ways to deal with waste materials and save water; simple and achievable methods by which to reduce the carbon footprint of ceramic art; and examples of practitioners who reclaim, reuse and recycle in their work.
