The Galactic Human Empire was built atop four sciences: logic, physics, psychology, and sociology. Standing on those pillars, humans spent 100,000 years spreading out into the galaxy: warring, exploring, partying -- the usual. Then there was the fifth science. And that killed the empire stone dead. The Fifth Science is a collection of 12 stories, beginning at the start of the Galactic Human Empire and following right through to its final days. We'll see some untypical things along the way, meet some untypical folk: galactic lighthouses from the distant future, alien tombs from the distant past, murderers, emperors, archaeologists and drunks; mad mathematicians attempting to wake the universe itself up.And when humans have fallen back into savagery, when the secrets of space folding and perfect wisdom are forgotten, we'll attend the empire's deathbed, hold its hand as it goes. Unfortunately that may well only be the beginning.

Theodosia Burr, daughter of Vice President Aaron Burr, came of age in New York City when the New Nation was growing up. She attended the inauguration of President George Washington in 1789, was at her father's side on the campaign trail and at his inauguration in 1801, attended presidential addresses to Congress, and hosted the most prominent politicians and thinkers of her time. The Burrs' ideas about educating young women were revolutionary. Theodosia was an experimenter in the equal treatment of women;regardless of social status,in education, family life, society, and the law. The family believed that women had an important role to play in the New Nation, and Theodosia was fully prepared. Based on research at libraries and archives, and from the rich body of letters Theodosia and her family left behind, this historical narrative introduces readers to a most unusual girl who pursued a radical new path for women.

With its fresh and fun design, the Children's Illustrated Thesaurus will inspire children to build a rich and vibrant vocabulary and help boost their confidence when they begin their next writing project.

In this novel by the creator of Alternate History Hub, WWII never happened, all of Europe hails Hitler, and the Mediterranean Sea is a desert. Instead of attempting to take over the world, Adolf Hitler and his Nazi party orchestrate an entirely different, yet equally ambitious plan: draining the Mediterranean Sea. With the promise of fertile new land for settlement, millions of jobs and endless hydroelectric energy, all of Europe signs a treaty called The Atlantropa Articles to bring about this new world. With Hitler hailed as a new Napoleon, fascism becomes a mainstream ideology. Two millennia later, Europe has been united under the swastika. But the plan of a lush new land was never realized. Instead, the Mediterranean Sea has become a desert basin known only as the Kiln, and southern Europe has been abandoned. This is where Ansel Engel's story begins. Deep in the Kiln, Ansel faithfully serves the Reich!until a shocking discovery leads him to unravel generations of lies and false prophets.

All of time is simultaneous. Matter tends towards perfection. Cats can be dicks sometimes. The Prince of Milk is a leisurely stroll from prehistory to the distant future, stopping for tea in the 21st century English countryside. Before the time machine, before the undead mannequins, before the cat with the universe eye, there were the arbiters. They regulated the world and kept reality from banging into itself. All was well in paradise. But even the gods end up in love triangles from time to time. Several galaxies and a dimension away, Wilthail is a small English village alternating between flower shows and the occasional divorce. Life ambles. Old men and women make peace with their gods. Little do they know three deities walk among them already, hiding their time before an ancient grudge rears its head. The world is a garden. The world is a gutter. Which is it? PRAISE FOR THE PRINCE OF MILK: "Please stop contacting me. I'm not going to read your book." - Exurbia's mother "Sorry, I don't like science fiction." - Woman on the bus "Is that you again? Look, we've talked about this." - Exurbia's mother

An antimeme is an idea with self-censoring properties; an idea which, by its intrinsic nature, discourages or prevents people from spreading it. Antimemes are real. Think of any piece of information which you wouldn't share with anybody, like passwords, taboos and dirty secrets. Or any piece of information which would be difficult to share even if you tried: complex equations, very boring passages of text, large blocks of random numbers, and dreams... But anomalous antimemes are another matter entirely. How do you contain something you can't record or remember? How do you fight a war against an enemy with effortless, perfect camouflage, when you can never even know that you're at war? Welcome to the Antimemetics Division. No, this is not your first day. ---- This ebook is an official release by me, qtm from the SCP Foundation wiki! PM me if you require confirmation. This ebook collects all of my Antimemetics Division fiction: SCP-055, SCP-2256 and the complete serials There Is No Antimemetics Division and Five Five Five Five Five.
