Quantum-Touch teaches techniques for focusing and amplifying life-force energy (chi) through simple breathing and body-awareness exercises. This practice stimulates our biological intelligence to promote healing in everything from major immune disorders to chronic pain to emotional disturbances. A new addition to Alain Herriott's successful series that includes Supercharging Quantum-Touch, this manual of advanced techniques is geared toward those who already know the basics of Quantum-Touch or have backgrounds in general energy healing, Chinese disciplines such as tai chi and qi gong, or the yogic and dance disciplines. Techniques are presented through step-by-step exercises that facilitate the energy flow through both teacher and patient. This energy transference encourages bone alignment, stress reduction, and deep and lasting healing. Quantum-Touch Core Transformation shows how to truly experience oneself (emotionally, spiritually, physically) and to begin to open consciousness and enter a whole new level of being. Written in the trademark thoughtful, engaging style of Quantum-Touch authors, this book is an authoritative resource for any alternative-health professional involved in serious bodywork.

Biotechnology crop production area increased from 1.7 million hectares to 148 million hectares worldwide between 1996 to 2010. While genetically modified food is a contentious issue, the debates are usually limited to health and environmental concerns, ignoring the broader questions of social control that arise when food production methods become corporate-owned intellectual property. Drawing on legal documents and dozens of interviews with farmers and other stakeholders, Corporate Crops covers four case studies based around litigation between biotechnology corporations and farmers: Pechlaner investigates the extent to which the proprietary aspects of biotechnologies;from patents on seeds to a plethora of new rules and contractual obligations associated with the technologies;are reorganizing crop production. The lawsuits include patent infringement litigation launched by Monsanto against a Saskatchewan canola farmer who, in turn, claimed his crops had been involuntarily contaminated by the company's GM technology; a class action application by two Saskatchewan organic canola farmers launched against Monsanto and Aventis (later Bayer) for the loss of their organic market due to contamination with GMOs; and two cases in Mississippi in which Monsanto sued farmers for saving seeds containing its patented GM technology. Pechlaner argues that well-funded corporate lawyers have a decided advantage over independent farmers in the courts and in creating new forms of power and control in agricultural production. Corporate Crops demonstrates the effects of this intersection between the courts and the fields where profits, not just a food supply, are reaped.
