A new, definitive, translation of the Karl Marx and Frederick Engels' Communist Manifesto by American socialist luminary, Hal Draper.

Black Quantum Futurism (or BQF) is a new approach to living and experiencing reality by way of the manipulation of space-time in order to see into possible futures, and/or collapse space-time into a desired future in order to bring about that future's reality. This vision and practice derives its facets, tenets, and qualities from quantum physics, futurist traditions, and Black/African cultural traditions of consciousness, time, and space. Inside of the space where these three traditions intersect exists a creative plane that allows for the ability of African-descended people to see "into," choose, or create the impending future. Featuring visions by Rasheedah Phillips, Moor Mother Goddess, Warren C. Longmire, Almah Lavon, Joy Kmt, Thomas Stanley, PhD, and Nikitah Okembe-RA Imani, PhD.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life,

and it will stimulate debate on the expansion of the use of insects as food and feed.

Poverty. War. Bureaucracy. Divisiveness. Gridlock. Exploitation. Farmland degradation. Water shortages. Oil Spills. Nuclear meltdowns. Unemployment. Job dissatisfaction. Debt. Divorce. Depression. Anxiety. Addiction. Fear. Isolation. Loneliness. The 21st century world we live in is charging full steam ahead, seemingly at the speed of light. Though this breakneck pace has created many amazing marvels of modern technology, it has also created a more complex set of interlocking problems than our species has ever seen before. We all contribute to perpetuating faulty global systems in one way or another, but it takes a lot of humility to be able to admit that. By firstly focusing upon changing and improving one's own ways of living, and beginning with the mantra of "it's all my fault" rather than immediately pointing fingers and telling everyone else to change we can break down cultural barriers, inspire action, and make much more rapid progress to reduce the immense suffering that exists in this world. Directly or indirectly, it affects us all. It's time for a new paradigm; a new type of culture that incorporates the interests of all global citizens. It's All My Fault lays out how we got here, how we can move forward in this journey, and delves deep into personal insights and vivid experiences from the author's life. It describes a practical set of innovative ideas that have the potential to ultimately lead to the day in which many of our greatest challenges such as poverty, homelessness, and underemployment become a thing of the past.

Dr. Brooke Spencer always felt different from other girls. Now a successful scientist, she is finally discovering where she belongs: working alongside the brilliant, trailblazing researcher Dr. Charles Samuelson. Dr. Samuelson has recently made a discovery that has eluded philosophers and dreamers for centuries: How to transmute iron into gold. Determined to use the knowledge for good, Dr. Samuelson recruits Brooke to assist him with his new plan, his "Golden Manifesto." But humans are not alone and his discovery has not gone unnoticed. Extraterrestrial visitors seek to control Dr. Samuelson's Breakthrough, and before long, Brooke is all that stands between Earth and total Destruction. Will she be able to hold her ground? Or will the timeless temptation of gold prove too much for even the strongest of spirits? Brooke will soon face a choice that will make her question her background, her career, and the fate of the planet.

Fascism vs. Capitalism: The Central Ideological Conflict of Our Times "Fascism" has become a term of general derision and rebuke. It is tossed casually in the direction of anything a critic happens to dislike. But fascism is a real political and economic concept, not a stick with which to beat opponents arbitrarily. The abuse of this important word undermines its true value as a term referring to a very real phenomenon, and one whose spirit lives on even now. Fascism is a specific ideology based on the idea that the state is the ideal organization for realizing a society's and an individual's potential economically, socially, and even spiritually. The state, for the fascist, is the instrument by which the people's common destiny is realized, and in which the potential for greatness is to be found. Individual rights, and the individual himself, are strictly subordinate to the state's great and glorious goals for the nation. In foreign affairs, the fascist attitude is reflected in a belligerent chauvinism, a contempt for other peoples, and a society-wide reverence for soldiers and the martial virtues. Lew Rockwell, in this new volume, examines the starkly contrasting systems of capitalism and fascism, noting pro-fascist trends in recent decades as well as the larger historical trends in the United States and internationally. In Section One, Rockwell focuses on the nature of fascism and its influence in Western society, with a focus on American political and economic institutions. In Section Two, Rockwell examines capitalism as the enemy of, and antidote to fascism. Combining economics, history, and political philosophy, this book doesn't just provide a diagnosis of what ails American and Western society, but also sheds light on how we might repair the damage that has been done, and with the help of the intellectual work of great minds like Murray Rothbard and Ron Paul, we might as a society shed the fascism of our times and look to freedom instead.

THE CALLING is a concept poem-book, at once scintillating and inspiring. The stars speak to us. What do they say?
