Direct injection enables precise control of the fuel/air mixture so that engines can be tuned for improved power and fuel economy, but ongoing research challenges remain in improving the technology for commercial applications. As fuel prices escalate DI engines are expected to gain in popularity for automotive applications. This important book, in two volumes, reviews the science and technology of different types of DI combustion engines and their fuels. Volume 1 deals with direct injection gasoline and CNG engines, including history and essential principles, approaches to improved fuel economy, design, optimisation, optical techniques and their applications. Reviews key technologies for enhancing direct injection (DI) gasoline engines Examines approaches to improved fuel economy and lower emissions Discusses DI compressed natural gas (CNG) engines and biofuels

This is Sir Steven Runciman's established and widely admired classic account of the Patriarchate of Constantinople, first published in 1968. The Great Church, as the Greeks called the Orthodox Patriarchate, was the spiritual centre of the Byzantine world. The Church's survival during the four centuries of Turkish rule which followed the fall of Constantinople bore witness to its strength and to the unquenchable vitality of Hellenism. Sir Steven Runciman's history of the Great Church in this period is written with scholarship, sympathy and style.
