"El Paso artist Tom Lea was commissioned by Life Magazine to paint the war as it was being experienced by U.S. and Allied soldiers, sailors, and airmen. Along with his sketchbook, Lea carried on these assignments his "record of work", a notebook in which he recorded observations and details on the images he hoped to create from the events he had seen." "Brendan M. Greeley, Jr. has collected virtually all of Tom Lea's firsthand accounts of his assignments for Life, along with his powerful sketches and unforgettable paintings, and placed them in context, along with photographs and research focusing on the people, places, and wartime events encountered by Tom Lea. Drawing on previously unpublished sources - the artist's diary, letters to the Texas historian J. Frank. Dobie, oral interviews, and archival materials from Texas and national collections - Greeley presents in *The Two Thousand Yard Stare* a uniquely comprehensive and sustained treatment of Lea's creative accomplishments during World War II."

In order to reduce the emissions to an absolute minimum, this book explain as to how these toxins can be regulated. It is no hidden secret that the world is witnessing an oil crisis. But with other alternative sources such as biogas, natural gas and coke based substances; diesel is not the only way forward. The unique characteristics and properties such as combustion and emission of the aforementioned alternatives are explained extensively in this book. The book also goes on to explain how one can look for early signs of wear and tear and malfunctioning components of a diesel engine and its parts.

A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara's unlikely role in Lee Iacocca's Mustang, John Z.

DeLorean's Pontiac GTO , Henry Ford's Model T, as well as Honda's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, Engines of Change is an entirely edifying new way to look at the American story.
